Ganpat University

DEPARTMENT OF COMPUTER SCIENCE

DD(BCA-MCA)

PROGRAM OUTCOMES (PO)

BCA - PO – 1	To produce skilled workforce for IT industries and IT enabled services
BCA - PO – 2	Able to apply theoretical and conceptual understanding of data structures and database management systems concepts for real life application development
BCA - PO – 3	To develop basic skill sets and necessary knowledge to solve basic hardware and software problems
BCA - PO – 4	Able to utilize the modern software development tools and techniques for application development practice.
BCA - PO – 5	Creating strength and entrepreneurship among students who can develop customized solutions for small to large businesses.
BCA - PO – 6	Generate solutions by conducting experiments and applying techniques to analyze and interpret data
BCA - PO – 7	Evaluate, verify, trouble-shoot, test and analyze an existing computer-based system, process, component or program.
BCA - PO – 8	Develop leadership skills, teamwork and entrepreneurial power among students who can develop customized software solutions for small to large businesses.
BCA - PO – 9	Empowering the application of communication theories and incorporating best verbal and written practices into real life communication.
BCA - PO – 10	Able to identify the needs of different businesses and utilize management information systems, reporting tools and content management systems
BCA - PO – 11	To develop students to become globally recognized and competent.
BCA - PO – 12	Develop the ability to understand the basic concepts of machine learning techniques, mobile application development and software testing.

PROGRAM SPECIFIC OUTCOMES (PSO)

BCA-PSO-1	To analyze, design and implement sustainable software system in the field of computer science
BCA-PSO-2	To acquire and explore technical knowledge in diverse areas of computer applications, which is helpful for successful career, entrepreneurship and higher studies
BCA-PSO-3	To provide platform to students to develop new and innovative project to fulfill the current industry need
BCA-PSO-4	To develop lifelong learning skills, effective communication skills and also to act as a good citizen by inculcating in them moral values & ethics

Course Outcomes:

Semester-1		
Subject	**Name of CO**	**Description**
U51A1ADP:Algorithm Development and Introduction to Programming	U51A1ADP-CO 1	Create algorithms to solve simple programming problems.
	U51A1ADP-CO 2	Understand the fundamentals of C programming.
	U51A1ADP-CO 3	Design, implement, test and debug programs that use calculations and selections.
	U51A1ADP-CO 4	Design, implement, test and debug programs that use conditional statements
	U51A1ADP-CO 5	Design, implement, test and debug programs that use loops and arrays
	U51A1ADP-CO 6	Design, implement, test and debug programs that use functions and structures.
U51A2IWD1:Introduction to web development – I	U51A2IWD1-CO 1	Employ fundamental of web programming
	U51A2IWD1-CO 2	Select and apply markup languages for processing, identifying, and presenting of information in web pages
	U51A2IWD1-CO 3	It is a programming language that lets web developers design interactive sites,Perform various styles of CSS.
	U51A2IWD1-CO 4	Provides Fundamental Internet concepts include web browsers, search engines, email, social media.
	U51A2IWD1-CO 5	Understanding about email protocol, e-commerce, Scripting Language and more
U51A3DM:Introduction to data analysis and data management	U51A3DM-CO 1	Improve quality of output in terms of presentations.
	U51A3DM-CO 2	Satisfy Document development requirement and reduce processing time.
	U51A3DM-CO 3	Ability to collate data together in desired format
	U51A3DM-CO 4	Learn to add graphics and multimedia for better presentation.
	U51A3DM-CO 5	Analyze previous data and predict future values via different charts.
	U51A3DM-CO 6	Ease of Content Sharing
U51A4ITS:Information Technology And System Maintenance	U51A4ITS-CO1	Identification of basic terminologies of computer, hardware devices and processor
	U51A4ITS-CO2	Detailing of processor, low-high-machine level language
	U51A4ITS-CO3	Knowledge of Peripheral Devices
	U51A4ITS-CO4	Identification of Computer System Management and Security
	U51A4ITS-CO5	Giving fundamental ideation of system errors
	U51A4ITS-CO6	Giving fundamental ideation of troubleshooting
	U31A1LDP-CO1	Create algorithms to solve simple programming problems.
U51B5CS1:Communication Skill-I	U51B5CS1-CO 1	To understand basics of communication skills and its process
	U51B5CS1-CO 2	To understand vocabulary, prepositions, various parts of speech and structural aspect of language
	U51B5CS1-CO 3	To develop the skill of effective listening and learn to listen and comprehend various tasks.To learn integrated skill of listening and writing.

	U51B5CS1-CO 4	To develop the skill of effective reading and learn to read and comprehend various tasks.
Semester-2		
U52A1DM1:Database Management System-I	U52A1DM1-CO 1	To understand about basics of Database Concepts and Architecture
	U52A1DM1-CO 2	To understand and apply Normalization & Transaction Control
	U52A1DM1-CO 3	To learn SQL and all SQL DML, DDL and DCL operations on oracle objects
	U52A1DM1-CO 4	To learn User Management and Security Management
	U52A1DM1-CO 5	To learn oracle built-in functions, join, set operators, group by clause and exists operator
	U52A1DM1-CO 6	To learn basics of Index, View, Sequence and advanced features of SQL
U52A2OOP:Object oriented programming concepts	U52A2OOP-CO 1	To get knowledge of basic concepts of java programming
	U52A2OOP-CO 2	To get knowledge of complex statement of looping, decision making of java programming
	U52A2OOP-CO 3	To get practical implementation of concepts of java about class,methods,object etc.
	U52A2OOP-CO 4	Get practical knowledge usage of package and exception handlingin java programming
U52A3WD2:Introduction to web development-II	U52A3WD2-CO 1	To get basic knowledge of HTML5, Javascript,CSS3 and jQuery.
	U52A3WD2-CO 2	Learn the new features and elements of HTML5
	U52A3WD2-CO 3	Learn HTML5 Advance concepts like to drawing elements using canvas and SVG, HTML5 API and HTML5 Web Storage Objects
	U52A3WD2-CO 4	Learn the advance CSS3 Concepts
	U52A3WD2-CO 5	Working with JQuery Methods, Events and Effects and able to Load jQuery in webpage
	U52A3WD2-CO 6	Students can do website designing by applying this knowledge.
U52A4BCN:Basic of Computer Networks	U52A4BCN-CO 1	To get basic knowledge of the Computer Network
	U52A4BCN-CO 2	To understand the Topology of the Network
	U52A4BCN-CO 3	Know about the Reference Model for transmitting the data
	U52A4BCN-CO 4	to better understand the network component
	U52A4BCN-CO 5	understand how to given IP address
	U52A4BCN-CO 6	Able to identify which protocol is used for which process
U52B5CS2:CommunicationSkill-II	U52B5CS2-CO 1	Learn about structures of grammar, Learn about Simple, compound and complex sentences and to develop vocabulary.
	U52B5CS2-CO 2	Learn about professional skills like presentation skill and group discussion, JAM Session, Assessments and evaluation
	U52B5CS2-CO 3	Learn about Writing Skills, To learn about professional writing and to understand the integrated module of Speaking and Writing skills
Semester-3		
U53A1DFS:Data	U53A1DFS-CO 1	Overview of the data structure (Primitive, Non-Primitive, linear

Structure		and non – linear)
	U53A1DFS-CO 2	To determine the various types of abstract data such as queue, stack, linked list
	U53A1DFS-CO 3	To comprehend the expression formats of prefix, infix and postfix
	U53A1DFS-CO 4	To understand the concept of nonlinear data structure – tree
	U53A1DFS-CO 5	To be able to explain and implement sequential search and binary search.
	U53A1DFS-CO 6	Describe and implement selection sort, bubble sort, merge sort and insertion sort.
U53A2DT1:Application development Tool-I	U53A2DT1-CO 1	Student will Gain understanding of an ERP system and also gain knowledge of different modules of any ERP
	U53A2DT1-CO 2	Problem solving and Logic development using Python programming language
	U53A2DT1-CO 3	Gain knowledge of object oriented concepts, Data structures of python, Exception handling using Python programming.
	U53A2DT1-CO 4	Gain knowledge of open source ERP system Odoo and learn how install and run Odoo on Windows Machine.
	U53A2DT1-CO 5	Will learn to createDatabase in Odoo and using various pre-configured odoo modules like Sales, CRM, eCommerce
	U53A2DT1-CO 6	Learn to develop Basic Odoo Module
U53A3DM2:Database Management System-II	U53A3DM2-CO 1	Students can apply knowledge for Data Management
	U53A3DM2-CO 2	They learn about creation of database ,deletion of database and manage account of different schemas.
	U53A3DM2-CO 3	Aware with manage database, query processing.
	U53A3DM2-CO 4	They learn programming and management working with PL/SQL program units, Programming topics will include the built-in packages that come with Oracle, the creation of triggers, and stored procedure features.
	U53A3DM2-CO 5	Become Data Administration and can performed role as a DBA
	U53A3DM2-CO 6	Manage Database different task very easily using Enterprise Manager
U53A4OS1:Operating System – I	U53A4OS1-CO 1	Introduction of various operating system
	U53A4OS1-CO 2	Basic overview of Process & process scheduling algorithms
	U53A4OS1-CO 3	Identify the problem of synchronization & interprocess communication
	U53A4OS1-CO 4	Identify the components of synchronization &deadload components and avoidance algorithm
	U53A4OS1-CO 5	Basic overview of memory management & fragmentation
	U53A4OS1-CO 6	Identify the components of page replacement algorithms
U53A5ACN:Advanced Computer Networks	U53A5ACN-CO 1	Able to get and understand actual work of OSI and TCP/IP model.
	U53A5ACN-CO 2	Get the knowledge of different format of data and analyze how to transmit the data on the network
	U53A5ACN-CO 3	To understand and get the knowledge of multiplexing, routing and switching
	U53A5ACN-CO 4	To know about the types of transmission medium
	U53A5ACN-CO 5	Able to get the knowledge of how virtual LAN works
	U53A5ACN-CO 6	Get the knowledge of different types of information system and how cryptography mechanism work in computer network

Semester-4		
U54A1DT2:Application development Tool-II	U54A1DT2-CO 1	Basic knowledge of websites Designing and CMS
	U54A1DT2-CO 2	Introduction to WordPress, Installation of WordPress and work with admin dashboard
	U54A1DT2-CO 3	Able to use the different Plugins and theme in wordpress
	U54A1DT2-CO 4	Use of HTML & CSS within WordPress and Customization of the theme
	U54A1DT2-CO 5	Create WordPress Website with posts, pages, media, widgets, plugins and theme customization
U54A2OS2:Operating system-II	U54A2OS2-CO 1	Able to understand the Memory and file Management.
	U54A2OS2-CO 2	Identify about the I/P and O/P Management.
	U54A2OS2-CO 3	Able to learn basic about the Shell Scripting Programming.
	U54A2OS2-CO 4	Identify about the Basic Commands, File and Directories Command of Unix.
	U54A2OS2-CO 5	Able to learn Vi editor
U54A3DT3:Application development Tool-III	U54A3DT3-CO 1	Understand the fundamental concept of .net framework
	U54A3DT3-CO 2	Implement C# Console applications
	U54A3DT3-CO 3	Basic overview and implementation of OOP concepts
	U54A3DT3-CO 4	Create window form application by using different controls
	U54A3DT3-CO 5	Implementation of Container control, MDI form, Menubar, Popup
	U54A3DT3-CO 6	Implement .Net applications with data Manipulation
U54A4MA1:(Elective - I) Mobile Applications Development-1	U54A4MA1-CO 1	Apply Basic knowledge of Software development to implements real time applications
	U54A4MA1-CO 2	Introduction to Android, Installation of Android Studio and work with Android Virtual Machine
	U54A4MA1-CO 3	Utilize understanding of the theory and concepts for understand life cycle of Android, Working with permissions, Emulator,Different types of Resources and DDMS
	U54A4MA1-CO 4	Utilize the techniques to design Screen of Android application using different types of Controls LikeTextView, Buttons, Seekbar, Menus, ActionBar and so on and also understand how move from one activity to other activities
	U54A4MA1-CO 5	Apply different types of Layouts like Linear, Relative to design application properly
	U54A4MA1-CO 6	Learn basic mobile application and generate application by experiments and applying techniques to analyze and interpret data
U54B5MIS:Management Information System	U54B5MIS-CO 1	Understand and apply the fundamental concepts of information systems.
	U54B5MIS-CO 2	Develop the knowledge about management of information systems.
	U54B5MIS-CO 3	Interpret and recommend the use information technology to solve business problems.
	U54B5MIS-CO 4	Apply a framework and process for aligning organization's IT objectives with business strategy

	U54B5MIS-CO 5	Able to implement with the help of real case study
Semester-5		
U55A1WPF:(Elective - II) Web Programming Framework	U55A1WPF-CO 1	Basic Knowledge of WAMP Server / XAMPP Server, Knowledge of CMS and Overview of E-Commerce Website
	U55A1WPF-CO2	Basic Introduction of Ecommerce, Installing and configuring Magento on localhost
	U55A1WPF-CO3	Apply and Configure Different types of products and various marketing strategies
	U55A1WPF-CO4	Use the Basic Shipping Methods and Payment methods and implement the order management
	U55A1WPF-CO5	Manage the customers and generate reports for analysis
	U55A1WPF-CO6	Able to manage the content for website and different theme integration
U55A2IML:(Elective – III) Introduction to Machine Learning	U55A2IML -C01	Students can utilize the knowledge of Python File & Data Handling
	U55A2IML -C02	Able to make script and analytics based on Regular expression
	U55A2IML -C03	To able to make Data Science Using Python
	U55A2IML -C04	To able to understand data visualisation and data plotting
	U55A2IML -C05	To be able to understand the fundamentals of Machine Learning and AI
	U55A2IML -C06	Apply the ML Concepts and Methodology using Visualise open source tool KNIME
U55A3STQ:Software Testing & Quality Assurance	U55A3STQ-CO 1	Importance and Objectives of Software Quality Assurance and Testing (SQAT)
	U55A3STQ-CO 2	Understanding and application of Software testing techniques
	U55A3STQ-CO 3	Software Testing Levels
	U55A3STQ-CO 4	Software Testing Types
	U55A3STQ-CO 5	Software Testing Process and Project execution approach with software testing quality and metrics
	U55A3STQ-CO 6	Software Testing Optimization with test automation and Risk based testing
U55A4SAD:System Analysis and Design	U55A4SAD-CO 1	To get idea about system, concepts, componements,types of system
	U55A4SAD-CO 2	How to perform documentation of system to representation,tools available
	U55A4SAD-CO 3	Concepts of system analysis and design for development of system
	U55A4SAD-CO 4	To perform training and evaluation of newly implemented system
	U55A4SAD-CO 5	Study about diagramic tools for system representation to user for better understanding
	U55A4SAD-CO 6	Perform analysis of some existing system to get better idea about system
U55A5SDP1:Software Project-I	U55A5SDP1-CO 1	To implement knowledge of different programming language
	U55A5SDP1-CO 2	To identify problem with analysis skill
	U55A5SDP1-CO 3	To prepare basic view for proposed system with documentation tools
	U55A5SDP1-CO 4	To get develop presentation and communication skill
	U55A5SDP1-CO 5	Applying prototype of proposed system
	U55A5SDP1-CO 6	To evaluate and enhancement of system

	U32B5LCS-CO4	Read, comprehend and apply the acquired knowledge
Semester-6		
U56A1SDP2:Software Project-II	U56A1SDP2-CO 1	To implement knowledge of different programing language
	U56A1SDP2-CO 2	To identify problem with analysis skill
	U56A1SDP2-CO 3	To prepare basic view for proposed system with documentation tools
	U56A1SDP2-CO 4	To get develop skills for team work., presentation,communication
	U56A1SDP2-CO 5	To prepare working system to contribute to society
	U56A1SDP2-CO 6	To evaluate and enhancement of system and explore industry

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year	2019-20					Effective for the batch Admitted in	June 2019		
Subject code	2IA01ADD		Subject Name			Architectural Design & Detailing- I			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	2	2	4	Theory	-	-	-
Hours	-	-	3	2	5	Practical	40	60	100

Objective:

- To introduce students to the language of architecture and characteristics of space through creative thinking.
- Introduction of basic fundamentals of design and design vocabulary with respect to function and aesthetics.
- Developing basic skill of expression that involves the ability to perceive, abstract and create the design of objects and spaces.
- Form and Space Making. Experiencing movement through space and time. Anthropometry and space.

Learning Outcome:

LO1: Translate abstract principles of design into architectural language.
LO2: Apply basic design principles to create architectural space and form.
LO3: Recognize the importance of anthropometry in creation of functional space.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Unlearn & Relearn – Abstract representation of events, memories, activities, objects and moods. Learning basics of architectural representation.	10
2	Principles of 2D and 3D compositions, function specific design solutions, developing aesthetical and technical understanding of space making, Introduction of the form and function, order and variations, basic organizational principles, Understanding the human body in space, Activities and their relationship with spaces, Scales and proportions, abstractions, sensory stimuli as components of architectural design.	15
3	Measure drawing of the articles within the small space and to study the relative proportions.	10
4	Space making and place making, theme based compositions, volumetric studies, area studies, Literature Review. Exercises related to elements of design, and perception of space.	15
5	Exercises related to Parameters of design, anthropometrics, human activity and the use of space, Interrelationship of architectural space to form, structure, and materials to help students develop a visual and tacit structural understanding through models and installations.	15
6	Understanding nature as a contextual setting.	5
7	Design of a simple architectural form based on an understanding of anthropometrics.	10

Reference Books	
1	Form, Space & Order-Francis D.K. Ching.
2	Lessons for Students in Architecture 1 & 2-Herman Hertzberger.
3	Experiencing Architecture- Steen Eiler Rasmussen.
4	Basic principles of Design - Maier Manfired (publisher: Van Nostrand Reinhold NY)
5	Introduction to Architecture – James Snyder, Anthony Caterex
6	Architecture Scale & Proportion and architecturally speaking - Eugene Raskin.
7	Towards New Architecture – Le Corbusier
8	Architecture: The Appreciation of Arts - Sinclair Gauidie.
9	Principles of three Dimensional Design by Wucius Wong (publisher: Van Nostrand Reinhold NY)
10	Architecture: Scale and proportion - Eugene Ruskin

Note:

(I) Exercises related each unit has to be carried out distinctively.

(II) Relevant case studies and literature studies can be given by the studio teachers and report has to be compiled by the students.

(III) The portfolio covering the above topics shall be presented for viva voce.

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year		2019-20				Effective for the batch Admitted in			June 2019
Subject code	2IA02BDV		Subject Name			Basic Design and Visual Arts - I			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	2	1	3	Theory	-	-	-
Hours	-	-	3	1	4	Practical	40	60	100

Objective:

- Analysis of visual impressions and representing in various media.
- 2D and 3D composition.

Learning Outcome:

LO 1: Imbibe skills of free hand sketching techniques using different media.
LO 2: Understand the basics of 2D & 3D sketching using various media.
LO 3: Understanding the basic of 2D & 3D compositions with different materials, colours and textures and learning the principles and elements of 'Design' through compositions.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Introduction to basics of 2D & 3D sketching using various media like pencils, Ink pens, charcoal pencils, water colours , poster colours , pastels, etc., Understanding light, shades and shadow.	8
2	Freehand sketching - simple buildings with landscape elements and household furniture, street furniture, human beings, cars, trees etc. Indoor & Outdoor sketching - Still drawings and Memory drawings.	12
3	Introduction of painting – Colour, Properties of colour, Colour schemes, Types of colours, colour theory. Exercises to understand colour value and intensity. Properties of paper, brush and other tools – Basic washes – 3D effects from still-life, nature and built environment using mono chromatic and multi-colour.	12
4	Introduction to rendering skills- Representation of surface textures of materials like stone, timber, brick, concrete, steel, glass etc. Rendering of perspective drawings of various built environments.	8
5	Compositions of positive and negative, 2D compositions based on geometrical forms and other objects. Design exercises for developing abstract reasoning, model making and volumetric compositions.	12
6	Exercise for order, balance - formal and informal balances, harmony, rhythm, splitting of the form, compositions with 2D and different texture and colour. The composition of the different forms in 3D with different materials, colours and textures with knowledge of property and nature of materials.	12

Text Books	
1	NA
Reference Books	
1	Form, Space & Order - Francis D.K. Ching.
2	Principles of Basic Design - Vol. 1 to 4 – Maier Manfred.
3	Rendering with pen and ink - Robert Gill.
4	Principles of two Dimensional Design - Wucius Wong.
5	Principles of colour composition - Wucius Wong.
6	Principles of Form and Design - Wucius Wong.
7	Graphics in Architecture - Francis D.K. Ching.
8	Architecture Scale & Proportion - Eugene Raskin.
9	Architectural Model Making - Eva pascualMiro.
10	From Models to Drawings - FrascariMarw.
11	Art in Everyday Life - Harriet Goldstein.
12	Ways of Seeing - John Berger.

NOTE: The portfolio covering the above topics shall be presented for term work at end of semester.

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	INSTITUTE OF ARCHITECTURE
Semester	I	Version	1.0.0.1
Effective from Academic Year	2019-20	Effective for the batch Admitted in	June 2019
Subject code	2IA03AGT	Subject Name	Architectural Graphics and Techniques - I

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	2	1	5	Theory	-	-	-
Hours	2	-	3	1	6	Practical	40	60	100

Objective:

- To introduce the concepts and fundamentals of Architectural Drawing.
- To understand drawing as a medium to visualize and communicate design ideas.
- To familiarize the students with the language of architecture & buildings as two dimensional and three dimensional representations.

Learning Outcome:

LO1: Recognize the need to combine the use of drawing aids (instruments) with the use of freehand drawings for architectural designs
LO2: Demonstrate a knowledge of and proficiency using line weights.
LO3: Cultivate drafting skills for producing architectural design and drawings using standard scale.
LO4: Understand the techniques of orthographic projection and Interpenetration.
LO5: Achieve a comprehensive understanding of representing Isometric and Axonometric projection

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	General introduction of drafting fundamentals, drafting equipment and materials architectural drafting conventions, drawing set up, drafting techniques, line work, line types, line weights, line quality.	12
2	Practice in lettering - single stroke letters - uppercase, lowercase, vertical and inclined letters. Different fonts used in architectural lettering.	12
3	Scales: Construction of plain scales and their uses in practice. How to use the different standard scales like 1:100, 1:200, 1:500, 1:50 etc.	12
4	Introduction to plane geometry and exercises in lines and angles, construction of triangles, quadrilaterals and regular polygons. Construction of plane curves, ellipse, parabola, hyperbola and ovals. Construction of Arches.	18
5	Orthographic projections, planes and principles of projection. First angle projection. Difference between orthographic projection and perspective. Projection of Planes and Solids. Projection of the architectural plan and elevations (single room and simple buildings) **Interpenetrations:** Simple exercises to understand the concept of interpenetration of different solids	24
6	Three dimensional representation, Isometric and Axonometric projection of architectural elements and simple buildings.	18

Text Books	
1	NA
Reference Books	
1	Engineering Drawing - N.D. Bhatt.
2	Graphic Thinking for Architects and Designers - Paul Leaseua.
3	Graphics in Architecture - Francis D. K Ching., Steven P. Juroszek
4	Visualization Techniques - Richard B.Leinbach.
5	Design Drawing - Ching, Francis D. K.

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year		2019-20				Effective for the batch Admitted in			June 2019
Subject code	2IA04BMC		Subject Name			Building Materials and Construction - I			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	2	1	5	Theory	40	60	100
Hours	2	-	3	1	6	Practical	-	-	-

Objective:

- The primary focus is on materials and systems, their properties and applications, and their intrinsic relationship to structural systems and environmental performance.
- Students will develop a fundamental understanding of: the relationship of materiality to construction systems and techniques.
- Understanding the traditional building materials like Mud and Bamboo and their application in a building along with their techniques and details of construction.

Learning Outcome:

LO1: Understanding basic structure of a building and there elements
LO2: Recognizing traditional building materials and their evolution
LO3: Understanding Mud and Bamboo as a building material
LO4: Achieve a comprehensive understanding of application of material in a building and their construction techniques

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	General introduction to building materials, Natural building materials; stone, mud, sand, timber. Building construction materials; bricks, terracotta, Lime mortar, cement mortar, concrete etc.	6
2	Understanding elements of a building, sub structure and super structure, typical wall section. Understanding mud and bamboo as a building material- its failure and behavior, Classification of mud, Tensile and compressive strength of mud and bamboo and its use in a building	12
3	Understanding of basic structural system and construction technique; Frame Structure in reference to mud, bamboo ; Method of construction and joinery details in bamboo, Mud Construction Techniques (Methods and examples)	18
4	Natural materials (Mud and Bamboo)- Their properties, forms and availability, defects, strength, limitation and utility. Construction of walls, floors, openings and roof using mud and bamboo.	18
5	Building construction materials; bricks: Manufacturing process, types, qualities and application method	18

6	Brick masonry-Masonry tools & equipment. Different types of bricks. Bonding of bricks & its principles, Stop end, T, L & cross Junctions of English bond, Header and Stretcher bond and Nonstructural bond. Attached & detached piers. Brick jallis, Corbelling, Cornices, Types of coping, pointing & Threshold.	24

5	Fundamentals of Building Construction - Allen Edward	

Note:

(I) Through practical site visits, presentations, case studies & workshop based on the application of theory to construction field.
(II) Minimum one plate on each construction topic and study of material in the form of portfolio.
(III) Hands on session to be conducted to execute wall masonry with different materials in construction yard.

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year		2019-20				Effective for the batch Admitted in			June 2019
Subject code	2IA05HUM		Subject Name			Humanities			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- To gain knowledge of the development of architectural form with reference to Technology, Style and Character in the prehistoric world, Ancient Egypt, West Asia, Greece , Rome, Medieval times and Renaissance period.
- To influence the architecture students to develop designs that are rooted in this country and suitable to the lifestyle of its people.
- To develop an appreciation of our varied culture and the resulting architectural productions which are unique in time and place.

Learning Outcome:

LO1: An understanding about the spatial and stylistic qualities associated with architecture.
LO2: To understand architecture as evolving within specific cultural contexts including aspects of politics, society, religion and climate.
LO3: Understanding of Formation of group living, formation of settlements and beginning of community living as rural & urban.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Response to culture and context in building shelter in the Neolithic period- R. Nile and the architecture of Egypt with relevant examples – Urban form in the Indus Valley and the Tigris and Euphrates basin and relevant examples of architecture.	10
2	Development of Architecture from caves and huts of prehistoric era. Wisdom of the ancients thro River Valley Civilization Principles of layout of Vedic villages to mounds, mausoleums, stupas and such structures as were developed in the Indus Valley, Egyptian, Mesopotamian and South-east Asian regions. Renovated natural caves of the Buddhist period as methods of obtaining large internal spaces. Examples are to be presented as expressive forms of attitudes towards greatness, fear, pride, possession, protection, seclusion etc.	12
3	Landscape and culture of Greece –Greek character – Greek polis and democracy – Domestic architecture– Evolution of the Greek temple and the building of the Acropolis –Public architecture: Theatre and Agora- optical illusions in architecture- City Planning. Roman history: Republic and Empire –Religion, culture, lifestyle - Roman character – Roman urban planning –architecture as imperial propaganda: forums and basilicas –	14

	structural forms: materials and techniques of construction spanning large spaces with relevant examples - domestic architecture.	
Text Books		
1	A History of Architecture - Sir Banister Fletcher	
2	A History of Architecture – Setting and Rituals - Spiro Kostof	
3	A global history of Architecture - Francis D.K. Ching	
Reference Books		
1	Understanding Architecture: Its elements, history and meaning - Leland M Roth	
2	Ancient Architecture: History of World Architecture – S. Lloyd and H.W. Muller	
3	Man the Builder - Gosta, E. Samdstrom	
4	Understanding Architecture - Bussagh; Marco	
5	The Indus Valley Civilization - R.E.M.Wheelers	
6	A Short History of Everything- Bill Bryson	

NOTE:

(I) Assignments to include study of concepts relating to cultural and religious beliefs, structure, climatic interfaces and integration of all these in the resultant forms.

(II) Models, analytical studies and paper presentations individually or in groups.

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year		2019-20				Effective for the batch Admitted in			June 2019
Subject code	2IA06SDS		Subject Name			Structural Design and Systems - I			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- This course provides students with a basic knowledge & overview of structural systems used in buildings. It will help Students to understand the technical vocabulary related to structure in the architecture discipline.
- It also delivers the basic principles of structural mechanics & how bending moment and shear force diagrams are used to analyze simple structural behaviour.

Learning Outcome:

LO1: Identify various types of structural systems.
LO2: Analyze different types of load acting on a building and infer the support reactions.
LO3: Understand different types of forces and calculate the resultant force on given built up sections.
LO4: Determine centroid, Moment of Inertia, Radius of gyration for some basic shapes, irregular shapes, I sections, T sections, built-up sections.
LO5: Understand mechanical properties of structural materials and their application.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	**Introduction to structural systems –** An overview into evolution of structures through history with examples. Definition of structural systems - Load bearing, framed, post and lintel, Vertical/lateral systems, cantilever, moment frame, braced frame, horizontal one-way and two-way systems, truss, arch, vault, dome, shell, cable stayed, suspended & membrane structures. Understanding Nature a creative base for understanding structures, correlating natural & man-made structures.	4
2	**Various Loads on structures -** Dead load (DL), live load (LL), static, dynamic, impact, and thermal loads. Concentrated, uniformly distributed load, uniformly varying loads. Analysis of a simple structure with respect to loads acting on it. Principle of transmissibility of loads: Understanding load flow by tributary load, load path and support reactions for horizontal members (slab, beam, and girder) and vertical members (post, wall, and footing).	4
3	**Force systems and Equilibrium of Forces -** Characteristics of forces, composition and resolution of forces. Types of force systems, moment, couple. Resultant and equilibrium of coplanar, concurrent and non- concurrent force systems. Calculation of different forces on simple objects and building elements.	8

4	**Geometrical properties of sections -** Definition of center of gravity and centroid. Centroids of basic figures. Finding of centroids of simple and composite sections through models. **Moment of inertia -** Definition of moment of inertia, Radius of gyration of simple cross sections and built up sections.	10
5	**Structural materials -** Mechanical properties of structural materials like wood, masonry, steel, concrete and fabric. Experiments to analyze corroborate crushing strength, energy use and rupture length of different materials. Enumerating advantages and disadvantages of Structural materials and choice of Structural Material for domestic buildings, Industrial buildings, Tall buildings and Long Span buildings.	6

Text Books	
1	NA
Reference Books	
1	Engineering Mechanics - Statics and Dynamics, Desai &Mistry.
2	Seeking Structure from Nature - Jeffrey Cook.
3	Fundamentals of Structures -SalvaDorie.
4	Applies Mechanics - S.B Jurnakar& H .J Shah.

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year			2019-20			Effective for the batch Admitted in			June 2019
Subject code	2IA07D&P		Subject Name			Drawing and Painting			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	2	1	3	Theory	-	-	-
Hours	-	-	3	-	3	Practical	40	60	100

Objective:

- To develop presentation skills, visual expression and representation, imaginative thinking and creativity through a hands on working with various mediums and materials.
- To familiarize the students with the various mediums and techniques of art through which artistic expression can be achieved
- To involve students in a series of exercises which will look at graphic and abstract representations of art
- To sensitize students to the grammar of visual perception by involving them in a series of free hand exercises to understand form, proportion, scale, figure ground etc.,

Learning Outcome:

LO1: To develop presentation skills, visual expression and representation, imaginative thinking and creativity through a hands on working with various mediums and materials.
LO2: To familiarize the students with the various mediums and techniques of art through which artistic expression can be achieved.
LO3: To familiarize students with the grammar of art by involving them in a series of free hand exercises both indoor and outdoor to understand form, proportion, scale, etc.
LO4: To involve students in a series of exercises which will help them experiment with form and volume.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
1	**Drawing** Introduction to art Elements and principles of drawing Types of drawing Visual effects of drawing Scale drawing & Composition Study of 3 D effects through light and shade from nature Spot sketching Drawing from imagination	15
2	**Color & Media exploration** Introduction of painting, Colour, Colour wheel Application and visual effects of colour.	15

3	**Painting** Indoor and outdoor painting, Rendering techniques Exercise involving Water colour Water soluble colour pencil, Oil colour Pen and ink	18

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year	2019-20					Effective for the batch Admitted in	June 2019		
Subject code	2IA08CE	Subject Name				Communicative English			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- The English Language Course for students of architecture would enhance their communication skills in English by developing their listening, speaking, reading and writing skills.
- It aims to develop their speaking skills with specific reference to prospective/actual clients, suppliers, business partners and colleagues.
- Enhance their reading ability of journals, research articles etc & develop their writing skills especially writing project proposals and reports.

Learning Outcome:

LO1: Learners will be able to speak convincingly, express their opinions clearly, initiate a discussion, negotiate, and argue using appropriate communicative strategies;
LO2: Read different genres of texts, infer implied meanings and critically analyze and evaluate them for ideas as well as for method of presentation;
LO3: Listen/view and comprehend different spoken excerpts critically and infer unspoken and implied meanings;
LO4: Write effectively and persuasively and produce different types of writing such as narration, description, exposition and argument as well as creative, critical, analytical and evaluative writing.

CONTENT & TEACHING UNITS

Unit	Content	
1	**Introduction** Listening: short talks, interviews and discussions from various media Speaking: negotiating meaning, convincing people- describing places Reading: texts on architecture	4
2	**Speaking, Reading and Writing** Listening: listen to talks for specific information Speaking: preparing a presentation using the computer, participating in small group discussion Reading: lengthy articles related to architecture and construction Writing: writing formal emails (Vocabulary: appropriate words to describe topics in architecture; Grammar: suitable grammar for writing a report.)	8
3	**Descriptive Presentation** Listening: Descriptions of place, conversations and answering questions Speaking: making a power point presentation on a given topic	8

	Reading: architecture manuals Writing: writing a report, writing essays-descriptive essays (Vocabulary: adjectives of comparison, Grammar collocations.)	
4	**Analytical Presentation** Listening: TED talks, Speaking: participating in group discussions, Reading: reading and interpreting visual information, Writing: writing analytical essays and argumentative,	10

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	I					Version	1.0.0.1		
Effective from Academic Year	2019-20					Effective for the batch Admitted in	June 2019		
Subject code	2IA09RSP	Subject Name				Related Study Programme I			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	NA					Theory			
Hours	**1.5 / 2 Week, Block Course**					Practical	ATTENDANT/ NOT ATTENDANT		

Objective:

The Related Study Programme (RSP) at the Institute of Architecture is a unique contribution to Architectural education. Initially called measure drawings, it is intended to take the students out into the field to get first-hand experience of traditional built environments. This subject recognizes the value of the traditional architecture as well as the importance of field experiences and travel in the learning of architecture. The students are encouraged to learn about not only the architectural form also related components of architectural relevance.

Learning Outcome:

LO1: The Students will develop the skills & understanding of measure drawing.
LO2: Students will get the understanding of "synthesis of learning from various courses" by observing; registering & mapping of actual built buildings.
LO3: Programme outcome will be extremely valuable in creating knowledge base on architecture field not only in India but of nearby countries as well.
LO4: Production of Accurate and precise drawings of many a monument, institution, settlement in India, which become a basis for future research.

CONTENT

Unit	Content	HRS
	• Student and faculty members stay at the selected Village for 6 to 9 days. • Students will get comprehensive awareness of that settlement. • Students will measure the built environment in terms of individual house, cluster of houses and building elements of that house. • Students will also documents the social, cultural, environmental aspects of that settlement. • Students came back at institute and make the final Drawings and report within remaining days.	6 to 12 Days

FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	II					Version	2.0.0.0		
Effective from Academic Year	2019-20					Effective for the batch Admitted in	June 2019		
Subject code	2IIA01ADD	Subject Name				Architectural Design & Detailing II			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	3	1	6	Theory	-	-	-
Hours	2	-	4	-	6	Practical	40	60	100

Objective:

Learning the basic principles of space making and form building through intensive design studio practice.

Learning Outcome:

LO1: Learning architectural design fundamentals (Relationship between people to built forms & built forms to environment)

LO2: Experimental learning of analytical study, pre-design process, design process & conceptualization stages in design.

LO3: Experimental learning of design communication skills – verbal, script & graphics

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	**Unit 1: Understanding the process for Design** • Fragment the pre design process and help students build formats/templates for analysis. • Guide to derive architectural design data through various studies • Guide to program and to understand the causes for architectural spaces • Guide to understand context & its influences • Guide to learn and experiment the design process • Guide to conceptualize the design/evolution of architecture • Guide to document the design project	18
B	**Unit 2:** A single space interior design project (Approximate 35% weightage) <u>SINGLE SPACE DESIGN</u> Enlighten the student on the design project overview & the design process to be followed through relevant presentations. Present an analytical discourse on an identical architectural design project covering • Architectural elements & relevant architectural terms • Space planning (response to user & purpose with logic & application of standards) • Material, form & structure • Aesthetics & visual perceptions	30

C	**Unit 3:** A small scale project with a site (Approximate 65% weightage) <u>SMALL SCALE MULTI-SPACE DESIGN</u> • Architectural, elements, spaces & terms • Noted projects & architects • Space planning (response to user & purpose with logic & application of standards) • Site planning (contextual response, response to the natural environment, response to views + general site planning guidelines) • Material, form & structure • Aesthetics & visual perceptions.	48

Text Books

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	INSTITUTE OF ARCHITECTURE
Semester	II	Version	2.0.0.0
Effective from Academic Year	2019-20	Effective for the batch Admitted in	June 2019
Subject code	2IIA02BDV	Subject Name	Basic Design and Visual Arts II

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	2	2	4	Theory	-	-	-
Hours	-	-	4	-	4	Practical	60	40	100

Objective:

- To understand the elements and principles of Basic Design as the building blocks of creative design through exercises that will develop originality, expression, skill and creative thinking.
- To involve students in a number of exercises to understand the grammar of Design and Visual composition.
- To understand architecture as a craft, of making and of putting together.
- To draw inspiration and clues from nature.
- To introduce Drawing as an analytical tool.

Learning Outcome:

LO1: An understanding of the qualities of different elements as well as their composite fusions.
LO2: An ability to engage and combine the elements of design in spontaneous as well as intentional ways in order to create desired qualities and effects.
LO3: Development of required skills – observation / analysis / abstractions / interpretation / representations / expressions through models and drawings.
LO4: Understanding by making.

CONTENT & TEACHING UNITS

Introduction to Spatial Design, Form and Structures through Basic Design – Elements of Design: Properties, qualities and characteristics of point, line, direction shape, form, colour and texture – Principles of Design: Scale, Proportion, Balance, Harmony, Rhythm and Contrast. – Concepts of Visual perception – Material and processes.
The course shall be conducted by giving a number of exercises in the form of Design studios, Seminars and Creative workshops that are aimed at teaching the following:

Unit	Content	Hrs
A	• Elements and Principles of Visual Composition and Pattern making. • Study of texture and schemes of texture both applied and stimulated and their application.	8
B	Material and Form / Structures – Nature based enquiry into form both Linear and Planar, fluid and plastic forms using simple material like Mount Board, metal foil, box boards, wire string, thermocol, clay, plaster of Paris etc.	8
C	Study of Solids and voids to evolve sculptural forms and spaces using specific process oriented methods like casting, moldings etc.	8

D	• Analytical appraisal of an iconic Design like a rietvelt chair, Eames chair etc., for form, function, visual characteristics, ergonomics etc. /evolution of a craft. • Analytical appraisal of building form in terms of visual character, form and function, play of light and shade, solids and voids, colors and texture.	8
E	ARCHITECTURE AS A DESIGN RESPONSE TO THE PHYSICAL ATTRIBUTES Indoor space, outdoor space, the concept of space in buildings; The relationship between man and space. Defining spaces and the degree of enclosure; Organization of spaces, fenestration and character of facade, enclosure and internal spaces, Perception of space in terms of mundane, vibrant, soothing, irritating, free flowing etc.	16
F	DESIGN OF A SMALL STRUCTURE Milk parlor / Snack kiosk / Garden pavilion / Entrance gate with a security booth / Bus stop with toilet, small shop, memorial and traffic island etc	16

Objective:

To involve students in a number of exercises that will help them develop the skill of representation in advance drawing techniques involving perspective and sciography.

Learning Outcome:

LO1: Logically perceive objects in third dimension.
LO2: Construct one and two point perspective drawings.
LO3: Learn design representation skills through perspective drawing and sciography
LO4: Understand the principles of shadow and sciography, formal & informal techniques to represent shadows graphically.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	ISOMETRIC AND AXONOMETRIC VIEWS Introduction to views, types and advantages. Isometric, Axonometric and Oblique view of objects, building components and Interior of the room.	8
B	ELEMENTS AND PRINCIPLES OF PERSPECTIVE DRAWING Principles of perspective drawings and understanding of all relevant terms like Picture Plane, Centre line of vision, Eye Level, Height Line, Vanishing Points, Cone of Vision, Station Point, Horizon line, Ground line etc. Basic principles of perspective drawing , Various types of perspectives - One point perspective, Two point perspective and three point perspective	4
C	PERSPECTIVE METHODS: Introduction to the concept of perspective drawing. One point and two point perspective of simple geometrical shapes like cube, prism, combination of shapes using picture plane method and measuring point method.	8
D	PERSPECTIVE: BUILDING INTERIOR Construction of one, two and three-point perspective grids - Construction of one and two point perspective of building interiors. Understanding the basic human proportion and scale. Adding of human figures, planters, furniture etc. in an interior perspective scene. Basic applications of shade and shadows and rendering techniques.	12

E	PERSPECTIVE: BUILDING EXTERIOR: Principles of shade and shadow – construction of shadow of simple geometrical shapes – construction of sciography on building, shadows of architectural elements. Introduction to short cut perspective method. Construction of one, two and three point perspective of building exterior. Adding of human figures, trees etc., Application of light and shadow and rendering techniques of building materials.	12
F	SCIOGRAPHY • Principles of Shade and Shadows- Sciography - Use, Definition, Direction of Light, Location of object, Method of finding shadows of a sphere, Right circular cone, shade of double curve surface of revolution, Shadows of architectural elements, Shadows of circular solids, Shadows on buildings. • Exercise on Shade and shadow of typical building on Elevation and Site Plan • Exercise on Shades and Shadows in perspective.	20

Credit	2	-	2	-	4	Theory	-	-	-
Hours	2	-	4	-	6	Practical	40	60	100

Objective:

- To give an introduction of brick and stone as a rural and traditional building materials and construction products.
- To enable an understanding of the principles, methods of construction and applications of the above for structural and non-structural building components.
- To enable design and detail using all these materials in simple buildings.

Learning Outcome:

LO1: Knowledge of properties, construction methods and detailing of brick and stone products for various parts of building.

LO2: Ability to design and detail structural and non-structural components of simple buildings using the above materials.

LO3: Investigate the construction technology of traditional and vernacular roofing systems with brick and stone and detailing of arches and lintels

LO4: Ability to integrate knowledge of properties and construction methods of basic building materials in the design of simple projects.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	Understanding brick and stone as a building material- its failure and behaviour, stone extraction and dressing of stone through different tools and method of manufacturing brick and their Classification	24
B	Construction techniques- traditional and modern, Introduction to Load bearing and Frame structure, Method of construction, types of masonry of stone and brick bonds- L and T junctions, typical wall section, foundation	24
C	Construction of walls, floors, arches, dome and vaults, stairs through brick and stone	24
D	Dry masonry and joinery of stone, pointing, Mortars like lime and cement used for construction of masonry structure	24

Reference Books

12	The Construction of Buildings - Barry, R.

Note:

- Minimum one plate on each construction topic and study of material in the form of portfolio.
- Hands on session to be conducted to execute wall masonry with different materials in construction yard.
- Site visits to manufacturing units of brick, stone quarries, construction sites and case studies of vernacular construction systems to be arranged by studio teachers and report to be compiled by students.
- Market survey of materials should be carried out by students.

Objective:

- To make students aware of how structural resolutions are important in realization of architectural design concept. At this stage, students shall be exposed to forces, moments, and resolution of forces.
- To make the students understand basic properties of solids and sections which influence their behaviour under the effect of various types of forces.

Learning Outcome:

LO1: Apply the concepts of action of forces on a body and should be able to apply the equilibrium concepts.

LO2: Students are taught basic geometric properties and the behaviour of materials under effect of forces.

LO3: Analyze the bending moment and shear force acting on simple structures and draw SFD and BMD.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	ANANLYSIS OF PLANE TRUSSES Analysis of plane trusses - Introduction to Determinate and Indeterminate plane trusses - Analysis of simply supported and cantilevered trusses by method of joints and method of sections.	8
B	SIMPLE STRESSES AND STRAIN - Concept of Deformable Bodies, Types of stresses and strains. Introduction to Hooke's Law. Elastic Constants- Young"s Modulus, Bulk Modulus, Modulus of Rigidity, Poisson's Ratio, Relationship among Elastic constants (no derivation). Thermal stress and strain. Demonstration of stress and strain in various building components.	8
C	INTRODUCTION TO BENDING AND SHEAR FORCES. Representation in method of balancing moments and free-body diagrams. Concept of Shear force and Bending Moment diagrams. BMD and SFD for simple structural elements subjected to various loads.	8
D	ELASTIC PROPERTIES OF SOLIDS Elastic properties of solids –concept of stress and strain –deformation of axially loaded simple bars-types of stresses- Concept of axial and volumetric stresses and strains. (Excluding composite bar).	8

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	INSTITUTE OF ARCHITECTURE
Semester	II	Version	2.0.0.0
Effective from Academic Year	2019-20	Effective for the batch Admitted in	June 2019
Subject code	2IIA07MMD	Subject Name	Model Making and Architectural Delineation

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	2	-	2	Theory	-	-	-
Hours	-	-	4	-	4	Practical	40	60	100

Objective:

- To introduce students to analytical and illustrative drawing techniques as tools in the materialization and expression of thoughts.
- To introduce model making as a generative process, a tool in Design generation.
- To inculcate the dynamic act of constructing in thinking process.
- To understand the challenges of proper craftsmanship.

Learning Outcome:

LO1: Exploration of conventional and less conventional techniques of representation in an attempt to creative visualization and to understand drawings as vehicles of thinking.

LO2: Versatility in making models ranging from study to presentation and in varying scales and materials.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	LINE, RENDER AND MIXED MEDIA Free hand sketching in architectural representation- pen, charcoal, ink, water colour, paints, mixed media, collages, lino cutting, print making as tools.	8
B	DIAGRAMMING Conceptual sketches - Plan, section, elevation, perspectives, isometric / oblique projections, axonometric /parallel projection, photography and montage as techniques in Architectural delineation from study till presentation. This can be explored by way of assignments that require study, analysis, and documentation with weightage given to representational expression and techniques.	12
C	DESIGN PROCESSES AND MODEL MAKING TECHNIQUES Generative / geometry, fractals, parametric / material explorations (both in traditional materials like mount, foam, thermocol, clay, plaster of Paris, Paper Mache, wood and new age materials like polystyrene, Aerocon blocks, plastics, meshes, and processes like carpentry, casting, moulding, welding ,laser cutting etc.	12
D	PRESENTATION MODELS Exploration in varying scales of models through instruction in techniques- Residential to urban - Historic / Contemporary buildings - Exercises involving topography, textures, landscapes, human elements etc.	16

E	STUDY MODELS AS A TOOL IN ARCHITECTURAL DESIGN PROCESS Exploration of the physical model as a tool through all phases of architectural design process, ranging from conceptual to specific design.	16

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	II					Version	2.0.0.0		
Effective from Academic Year	2019-20					Effective for the batch Admitted in	June 2019		
Subject code	2IIA08TOA	Subject Name				Theory of Architecture			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- To make the students learn the theoretical aspects of design and understand how it could be manifested in architectural design.
- To understand the ideologies from works of architects and planners.
- To learn the design communication skills to enable to put forth the design ideas in graphics and literature.

Learning Outcome:

LO1: An objective awareness of the natural and built environments (past and present) through critical observation.

LO2: An understanding of the basic nature and vocabulary of the design process.

LO3: An understanding of their own power of analysis and the ability to derive ideas from abstract thinking.

LO4: An ability to develop a critical approach to architectural thinking and the ability for students to criticize their own work.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	PRIMARY ELEMENTS IN ARCHITECTURE Geometry in Architecture - points, lines and shapes.-Linear elements -planar elements and volumetric elements. Patterns in nature and building design. Order to chaos. Regularity and irregularity.	4
B	FORM AND SPACE Elements of spatial definition – form defining space - elevated base plane, depressed base plane vertical and horizontal elements defining space -depth and density of space - spatial juxtaposition and interpenetration – spatial characteristics of elementary shapes - qualities of architectural space - degree of enclosure. Analysis of works of F.L Wright and Le Corbusier.	4
C	ORDERING PRINCIPLES AND MEANING IN ARCHITECTURE Ordering Principles-Axis -Symmetry -Hierarchy - Datum -Rhythm -Repetition - Transformation - Measure and balance – spaces on human scale - proportion -- Golden Section, Le modular, Fibonacci series – Renaissance Theories - anthromorphism and architecture - Figure and ground, positive and negative spaces.	4

D	CONCEPTS IN ARCHITECTURAL DESIGN Concept – types- Ideas and Intent in design - Intuitive, contextual, Iconic, Experiential, Symbolic, Modular. Ideologies and philosophies of architects'. Case Studies. Importance of graphics in architectural design. Study of site plans, city plans, conceptual drawings. Interpretation of architects' conceptual sketches and the respective buildings.	4

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	II					Version	2.0.0.0		
Effective from Academic Year	2019-20					Effective for the batch Admitted in	June 2019		
Subject code	2IIA09SP	Subject Name				Summer Programme I			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	NA					Theory			
Hours	**1 Week, Block Course**					Practical	ATTENDANT/ NOT ATTENDANT		

Objective:

The Summer Programme (SP) at the Institute of Architecture is a unique contribution to Architectural education. Initially called measure drawings, it is intended to take the students out into the field to get first-hand experience of traditional built environments. This subject recognizes the value of the traditional architecture as well as the importance of field experiences and travel in the learning of architecture. The students are encouraged to learn about not only the architectural form also related components of architectural relevance.

Learning Outcome:

LO1: Students will get the understanding of "synthesis of learning from various courses" by observing; registering & mapping of actual built buildings.

LO2: Programme outcome will be extremely valuable in creating knowledge base on architecture field not only in India but of nearby countries as well.

LO3: Production of Accurate and precise drawings of many a monument, institution, settlement in India, which become a basis for future research.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	This summer workshop aims at creating understanding of inherent form and order in the built environment by observing it and analyzing by sketching and measure drawing. Hand sketch also gives an opportunity to students for examining the systems, scale and architectural language of the built.

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	INSTITUTE OF ARCHITECTURE
Semester	III	Version	2.0.0.0
Effective from Academic Year	2020-21	Effective for the batch Admitted in	June 2019
Subject code	2IIIA01ADD	Subject Name	Architectural Design & Detailing III

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	4	2	8	Theory	-	-	-
Hours	2	-	6	2	10	Practical	40	60	100

Objective:

To Understand, Analyse and apply the building materials' basic properties of building material to create Built environment & architectural form at the same time demonstrate ability to create certain ambiance and scale as resultant of material and structure

Learning Outcome:

LO1: Thorough understanding of particular material in terms of properties and behaviour
LO2: Explore the joinery and construction details with response of the particular material
LO3: Derive most appropriate forms using specific material keeping intact its core behavioural properties.
LO4. Develop and apply the studio program effectively in to the derived form for the given materials

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	**Unit 1: Explore the variety of materials** • List out various building materials to be exercised • Understand and list out various physical, tangible non tangible properties of the materials. • Prepare SWOT chart for comparative analysis • Select any one material per group of students	30
B	**Unit 2: Case study of those materials** • Make a case study of the given materials for a small or medium scale building • Observe use of material and joinery-construction details. • Learn the limitations and scope of particular materials for a specific form and structure	30
C	**Unit 3: Prepare a detailed program for a project to be designed with the identified site** • A single or 2-3 typology of building project to be identified to execute as a studio project • Site shall be identified for the project and go through the site analysis • As per program prepare concepts for the project with given Material • Undergo design process to come out with final Design	50
D	**Unit 4: Final Drawings and Models** • Prepare and submit all Floor plans,Layout, Elevation and Sections drawings	50

	• Provide all working details for specific design done by an individual students for the material subscribed by them • Prepare and submit Study models and full project design model along with the site.

4	Neufert Architect's data - BousmahaBaiche& Nicholas Walliman
5	Residential Buildings by Master designers & Vernacular master pieces.
6	Space Planning Basics - Mark Karlen
7	House Form and Culture - Rapoport, Amos.
8	Form, Space & Order-Francis D.K. Ching .
9	50 Beautiful house in india, vol-2 - Sei.
10	Design in Architecture –Geoffrey Broadbent.
11	25 Tropical Houses in Singapore and Malaysis - Mcgillick Paul.
12	A Pattern language- Christopher Alexander.

Note:

(I) Exercises related each unit has to be carried out distinctively.

(II) Relevant case studies and literature studies can be given by the studio teachers and report has to be compiled by the students.

(III) The portfolio covering the above topics shall be presented for viva voce.

NOTE: The portfolio covering the above topics shall be presented for term work at end of semester.

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	INSTITUTE OF ARCHITECTURE
Semester	III	Version	2.0.0.
Effective from Academic Year	2020-21	Effective for the batch Admitted in	June 2019
Subject code	2IIIA02BMC	Subject Name	Building Materials and Construction - III

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	2	2	6	Theory	40	60	100
Hours	2	-	3	2	7	Practical	-	-	-

Objective:

- To focus is on materials, their properties and applications, and their intrinsic relationship to structural systems and environmental performance.
- To develop application based understanding of: the relationship of materiality to construction systems and techniques.
- Understanding "Timber" as a building material and its application in a building along with its techniques used in different forms and joinery details of construction.

Learning Outcome:

LO1: Understanding different elements of a building where timber can be used as material.
LO2: Recognizing timber as a traditional building materials and it's evolution with time.
LO3: Understanding application of timber in different parts of a building and construction techniques and joinery details.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	General introduction to building elements where timber can be used as a material for construction. Different forms of timber, its properties, strength and weakness. Evolution of use of timber with time and it's extraction from wood along with manufacturing process of it.	12
2	Learning different methods of construction used in construction of different types of timber doors and windows, their standard sizes and details of construction.	18
3	Understanding of basic structural system and construction technique to manufacture different types of timber roofs, walls and floors on ground and above them along with their construction and technical details.	30
4	Knowledge of compounds walls and gates made out of wood and the process behind its construction. Also, giving a brief introduction about processed wood.	12
5	Understanding construction techniques and details of different types of staircase made from timber and other structural and nonstructural elements like wall paneling and false ceiling constructed from timber.	24

3	Construction Technology Vol.-I-Chudley
4	Building Construction Illustrated-FransisD.K.Ching.
5	Fundamentals of Building Construction - Allen Edward

Note:

- Minimum one plate on each construction topic and study of material in the form of portfolio.
- Hands on session to be conducted to execute wall masonry with different materials in construction yard.
- Site visits to manufacturing units of brick, stone quarries, construction sites and case studies of vernacular construction systems to be arranged by studio teachers and report to be compiled by students.
- Market survey of materials should be carried out by students.

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	III					Version	2.0.0.0		
Effective from Academic Year			2020-21			Effective for the batch Admitted in			June 2019
Subject code	2IIIA03HOA		Subject Name			History of Architecture-II			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- To Learn the evolution of world architecture took place at different region in different era of time line in a chronological order
- To study and understand cultural, social, geographical aspects which influenced and played vital role for Egypt, Greek, Roman, Gothic architectural evolution
- To Study various architectural elements, building techniques of specific architectural style.
- Overview how a town planning was carried out within geographical limits and requirements of those regions and community

Learning Outcome:

LO1: To understand architecture as evolving within specific cultural contexts including aspects of politics, society, religion and climate.

LO2: Understanding of derivation of specific architectural elements construction techniques for local

materials availability which became prominent architecture feature of those architectural style.
LO3: Refinement of construction techniques with scientific approach over a period of dynasties and centuries

CONTENT & TEACHING UNITS

Unit	Content	HRS
A	**Egyptian architecture** • The belief of life after death and cultural values of Egypt in that particular era • Evolution of Mastabas • Start of formation of Pyramids over number of dynasties • Study of Construction techniques and materials for building pyramids and internal parts of pyramids in details .Finest Examples: Great pyramid of Cheops(Khufu),step pyramid of Sakkara • Descriptions and details of Various monuments like sphinx and temple of karnek	8
B	**Greek Architecture** • Overall development of Greek architecture with gradual rise of prominent Greek column orders: Doric, Ionic, Corinthian. In-depth Study of these column orders. • Scientific approach of optical correction in shape, size and allocation of these columns • Acropolis of Athens and its important buildings constructed and redeveloped over a period of time • The finest example of Greek Architecture: Parthenon, Agora	8
C	**Roman Architecture** • How the legacy of Greek architecture brought forwarded to Roman Style of Architecture. • Geographical study and understanding of Roman Empire along with sensible approach towards town Planning with introduction of Public baths, Aqua Ducts, Squares or Nodes at intersections of axial roads • Specific architectural elements like semicircular arches columns, symmetrical design and materials like fine lime mortar, Concrete, Dressed stone Masonry developed and successfully used by Roman • Examples:Pantheon,Coliseum	10
D	**Gothic Architecture** • Entirely new approach towards the building design where in Priest were considered as an architects of their churches,Study of Overall scientific approach and innovation of completely new and unique building techniques and elements • Rose windows • Pointed Arches • Flying buttresses • Ribbed Vault • Famous and finest Example: Notre dame Paris	6

Text Books

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	INSTITUTE OF ARCHITECTURE
Semester	III	Version	2.0.0.0
Effective from Academic Year	2020-21	Effective for the batch Admitted in	June 2019
Subject code	2IIIA04SDS	Subject Name	Structural Design and Systems III

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture (DT)		Practical (Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- Observe and evaluate how structural resolutions are important in realization of architectural design concept. At this stage, students shall be exposed to applications of principles of mechanics of rigid and deformable bodies in engineering applications.
- Understand basic properties of solids and sections which influence their behaviour under the effect of various types of forces on fixed beam, Arches.

Learning Outcome:

LO1: Apply principles of statics to determine reactions & internal forces in statically determinate structures.
LO2: Students are taught Determine displacements of statically determinate structures.
LO3: Determine stresses due to axial & eccentric loading.
LO4: Determine buckling load for columns & struts with different end conditions.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	**Fundamentals Of Statically Determinate Structures:** Types of statically determinate & indeterminate structures, static and kinematic indeterminacy, stability of structures, principle of superposition, Maxwell's reciprocal theorems. Computation of internal forces in statically determinate structures such as plane truss, plane frame, grids.	8
B	**Shear Stress:** Calculation of shear stress for simply supported & cantilever beams of various cross sections like T, L, I, O, Rectangle, Hollow sections etc. **DIRECT AND BENDING STRESSES:** Members subjected to eccentric loads, middle third rule, kernel of section, chimney subjected to wind pressure, retaining walls. **COLUMNS AND STRUTS:** Buckling of columns, different end conditions, effective length, least radius of gyration, Euler's and Rankine's formulae, columns with initial curvature, eccentrically loaded columns, columns with lateral loading.	8

C	**Fixed Beams &Moment Distribution Method:** Computation of fixed-end actions for various types of loads and secondary Effects using basic principles, beams of varying moment of inertia. Analysis of propped cantilever beams & beams using Moment distribution method.	8
D	**Arches:** Calculation internal forces in three hinge arches with circular and parabolic shapes subjected to various types of loading.	8

Programme	Bachelor of Architecture				Branch/Spec.	INSTITUTE OF ARCHITECTURE			
Semester	III				Version	2.0.0.0			
Effective from Academic Year	2020-21				Effective for the batch Admitted in	June 2019			
Subject code	2IIIA05BS		Subject Name		Building Services-I				
Teaching scheme					Examination scheme (Marks)				
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

To Understand analyse and apply all basic Building services like Electrification, Lighting, communication, Vertical Transportation which enables the functions of the design in an active mode.

Learning Outcome:

LO1: Understand the network of electrification and components of wiring including to derive the electric load to be generated through the usage of equipment and appliances

LO2: Apply acquired knowledge to importance of natural and artificial lighting ,resources for the both types of lighting arrangement which are the most important requirement of the built environment

LO3: To adapt newer and latest technology and equipment's for modern and fundamental requirement of Information and communication

LO4: High tech applications and services to be implemented for all type of functional areas like residential, commercial, corporate and Industrial.

Theory syllabus

Unit	Content	Hrs
A	**Electrification** • Types of electricity, terminology, lighting accessories, protective devices • Electric power supply system from generation to customer, single phase, three phase. • Electrical distribution in a building from main distribution board to switch board.	8
B	**Lighting** Light and its sources, the visual field, day lighting and its types. • Day lighting criteria, • Artificial lighting, kind of lighting, illumination, • Calculations for lighting levels.	8
C	**Information and communication** • Various Modern application of communication and devices to be used in network • Wi-Fi facilities and provision of electricity and wiring network, specific various types of wires • Server and distribution area , junctions for modem and other devices	6
D	**Vertical transportation** • Lifts, grouping of lifts, return-travel time, design of lift well, carrying capacity, installation requirements. • Design of specialized lifts for heavy loads or for service • Concept of moving walks and escalators and their design concerns.	10

Practical content

Site visits & Case studies. Market surveys of Electrification, Vertical transportation , Lighting, IC

Objective:

- To make students aware of how surveying and levelling is important in realization of architectural design concept. At this stage, students shall be exposed to applications of principles of Surveying and Levelling in planning.
- To understand basic Techniques of surveying and levelling, Types of survey,measurement of angles, computation of areas.

Learning Outcome:

LO-1: Understand the concept of measurement techniques as well as map and associated details.
LO-2: Computation of ground profile using different levelling technique.
LO-3: Estimation of area and volume by field measurement as well as using formula.
LO-4: To locate and marking of buildings, roads, rails various features etc using method of Plane Table Survey and Theodolite Survey.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	**INTRODUCTION:**Role of Civil Engineer in Surveying, Definition, Basic measurements, Scale and Mapping, Types of Maps and their uses, Map sheet numbers, Map projections, Principles of Surveying, Classification of Surveying, Division of Surveying, Control networks, Locating position and topographic detail. **MODERN TOOLS OF SURVEYING AND MAPPING:**Introduction to Global Positioning System, Remote Sensing and GeographicInformation System. Total station. **LINEAR MEASUREMENTS:**Methods, Chain and Tapes Instruments used in chaining; Chain surveying, Ranging, Errors in chaining, Conventional symbols.Field work, Distance adjustment, Errors in taping, Accuracies.	10

B	**MEASUREMENT OF ANGLES:** **COMPASS:** Types and uses of compass, Bearings, Whole Circle Bearings and ReducedBearings, Computation of angles; Meridians & its related examples; **THEODOLITE TRAVERSING:** Introduction**,** Field procedure, Measurement of Horizontal and Vertical Angles, Method of Repetition, Method of Reiteration, Theodolite Traverse, Adjustment of traverse.	8
C	**ELEVATION MEASUREMENTS:** Levelling, object and uses, terms used in levelling, levelling instruments,methods of levelling, recording and methods of reducing, errors in levelling &examples related to levelling, contours; characteristics and applications.	8
D	**PLANE TABLE SURVEY:** Introduction, principle, instruments, setting up the plane table, methods of Plane tabling, advantages, sources of Errors.	8
E	**CURVES:** Introduction, theory and setting out methods of simple circular curve, elements of a compound and reverse curves, transition curve, types of transition curve, combined curve, types of vertical curves.	6
F	**COMPUTATION OF AREAS:** Methods to compute area of traverse- Determining areas from Plans,Trapezoidal rule- Simpson's rule, Use of planimeter	8

Objective:

- Sense the Natural elements and climate which on a large scale impacts the built environment created through the design.
- Apply various methods to inculcate the practices and approach which promotes the use of conventional ideas using climatic conditions which ultimately mitigate the distortion of natural resources.

Learning Outcome:

LO1:Observe and sense the natural elements and effects on livelihood of human being
LO2: Understand and analyse various patterns of climate and its impact on different region
LO3:Incorporate methods of using natural elements in to actual design
LO4: Analyse the climatic conditions and develop various architectural and construction elements to mitigate challenges.

Theory syllabus

Unit	Content	Hrs
A	**Climate** Constituent elements, Classification of tropical climatic zones. Micro & Macro climate. Thermal comfort & principles of Thermal Design.	8
B	**Ventilation** • Need of Ventilation • Types of Ventilation • Air movement & penetration • Solar orientation, Sun path pattern & shading devices.	10
C	**Orientation of site layout and building components** • Traditional House Form & Settlement pattern in various tropical climates. • Design Tools – Mahoney Tables, Sun Path diagrams, etc. • Day lighting – components, architectural methods of borrowing day light; control of glare.	8
D	**Time problem to prepare a design and model entirely produced on climatic conditions for specific regions of Indian territory**	6

Teaching scheme					Examination scheme (Marks)				
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	1	1	2	Theory	-	-	-
Hours	-	-	1	1	2	Practical	40	60	100

Objectives:

To explore subjects and topics other than regular one which add value the knowledge gained

Learning Outcome:

LO1:To analyse variety of latest materials used in construction industry
LO2: Categorize the use of materials as per the size and scale of elements or building parts
LO3: Observe various limitations and scop of specific material
LO4: Evaluate the usage the materials and derive how this material is adopted as a substitute or regular use

Theory syllabus

Unit	Content	Hrs
A	Introduction of Plastic as a construction material	4
B	Overview about the manufacturing of plastic material. Types of Plastics. Properties of plastic.	8

C	Study Limitation and scope of Plastic as a construction material	8
D	Application of material on various elements and building component	6
E	Prepare a design and model for specific program to be executed with specific material selected	6

Practical content	
Exercises based upon above topics. Models, installations and artworks

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DESIGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	III					Version	2.0.0.0		
Effective from Academic Year			2020-21			Effective for the batch Admitted in			June 2019
Subject code	2IIIA09RSP		Subject Name			Related Study Programme II			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	NA					Theory			
Hours	**1.5 / 2 Week, Block Course**					Practical	ATTENDANT/ NOT ATTENDANT		

Objective:

The Related Study Programme (RSP) at the Institute of Architecture is a unique contribution to Architectural education. Initially called measure drawings, it is intended to take the students out into the field to get first-hand experience of traditional built environments. This subject recognizes the value of the traditional architecture as well as the importance of field experiences and travel in the learning of architecture. The students are encouraged to learn about not only the architectural forms also related components of architectural relevance.

Learning Outcome:		
LO1: The Students will develop the skills & understanding of measure drawing. **LO2:**Students will get the understanding of "synthesis of learning from various courses" by observing; registering & mapping of actual built buildings. **LO3:**Programme outcome will be extremely valuable in creating knowledge base on architecture field not only in India but of nearby countries as well. **LO4:**Production of Accurate and precise drawings of many a monument, institution, settlement in India, which become a basis for future research.		
CONTENT		
Unit	Content	HRS
	• Student and faculty members stay at the selected Village for 6 to 9 days. • Students will get comprehensive awareness of that settlement. • Students will measure the built environment in terms of individual house, cluster of houses and building elements of that house. • Students will also documents the social, cultural, environmental aspects of that settlement. • Students came back at institute and make the final Drawings and report within remaining days.	6 to 12 Days

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture		Branch/Spec.	INSTITUTE OF ARCHITECTURE	
Semester	IV		Version	2.0.0.0	
Effective from Academic Year	2020-21		Effective for the batch Admitted in		June 2019
Subject code	IVA01ADD	Subject Name	Architecture Design and detailings- IV		

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	8	-	8	Theory	-	-	-
Hours	-	-	8	-	8	Practical	40	60	100

Objective

A study of human built form and community living based on lifestyle, culture, nature and economic forces.

Learning Outcome:

LO1: To understand the concept of a community, its necessity and its contribution towards the larger role it plays in the development of architectural fabric of that given locality.

LO2: Explore systems and methods to analyse the triggers and factors responsible for the generation of that lifestyle and culture, which in turn affects the house form.

LO3: To develop an ability to design a house typology, cluster layout and site planning based on the lifestyle & culture study.

CONTENT AND TEACHING UNITS

Unit	Content	Hrs
A	**Initial exercises and Case studies:** • Factors affecting house form (climate, topography, lifestyle and economics) • Study of settlement types (nomadic, traditional, rural and urban) • Case studies to learn house form and settlement typology of a community	**12**
B	**Site analysis and Model making:** • Study of context and surroundings • Study of climate and Topography • Study of green cove and site landmarks • Study of built vs. open ration of site • Study of existing bylaws and regulations • Preparing a scaled model for the site which is selected for the studio program	**18**

C	**Program analysis and Conceptual Design development:** • Study of Socio economic condition of user group • Study the occupation/s of user group • Study the scale of housing (No. of families, No. of houses etc.) • Study of lifestyle and daily routine of the user group • Analysis of program through volumetric and diagrammatic representation of spaces • Study of inter relation between those spaces and the lifestyle of the user group • Preparing the intent statement based on the above studies for the vision of the settlement type • Based on the intent statement make initial configurations for the housing settlement through block models, sketch 3ds etc. • Develop one or more house forms for the user group keeping in mind various studies which are done while analyzing the program	**24**
D	**Design Development to Finalisation of Design:** • Developing the house from/s through continuous iterations done with the help of plans, sections, axonometric and isometric views. • Formation of streets, clusters and blocks based on the systematic arrangement of houses. • Addition of common amenities like street furniture, open spaces, play areas etc. based on the overall site plan development. • Based on the physical and programmatic forces affecting the site, an appropriate site plan should be derived which adheres to the intent statement. • Generating the site plan through 3d models, digital models, sketch and photographic documentation. • Documentation of process through continuous photographic and digital scanning process. • Making finalised drawings (plans, sections, elevations, axos etc.) and models (physical and digital) for the purpose of final accessement and discussions.	**42**

Objective:

- The primary focus is on materials, their properties and applications, and their intrinsic relationship to structural systems and environmental performance.
- Students will develop application based understanding of: the relationship of materiality to construction systems and techniques.
- Understanding "RCC and Steel" as a building material and its application in a building along with its techniques used in different forms and joinery details of construction.

Learning Outcome:

LO1: Understanding Steel and basic constituent elements of RCC- Cement, aggregates, sand and steel etc. as different building materials and their application in a building

LO2: Recognizing RCC and Steel as a contemporary building materials and it's evolution with time.

LO3: Understanding application of RCC and Steel in different parts of a building and construction techniques and joinery details.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Introduction todifferent building materials like steel and constituent elements of R□□ - Cement, aggregates, sand and steel etc., their types, propertiestensile and compressive strength, weakness, propertiesand their application in a building	12
2	Sensitizing students withdifferent metals used for building construction, properties and behavior of material in different conditions, their standard sizes, sections, and use of it in construction.	12
3	Understanding Precast and cast-in-situ RCC, pre-stressed, pre-tensioning and post-tensioning of concreteconstruction. Formwork, Shuttering, Shoring, Shuttering- their techniques and use in building.	18
4	Learning typical RCC foundation;construction techniques in precast and cast-in-situ of different horizontal bands like-DPC, Sills, lintels, beams along with vertical elements like columns, walls and staircase, different types of slabs, floors and roofs	24
5	Understanding construction of different types of steel structures and their elements like foundation, floors, columns, beams, staircase and roofs/ trusses made from steel along with its joinery detail.	18
6	Recognizing different joints in a building like construction joints, expansion/	12

	contraction joints- its use and construction details.

Objective:

- To Learn the evolution of world architecture took place at different region in different era of time line in a chronological order
- Western : To study and understand cultural, social, geographical aspects which influenced and played vital role in development of the following eras Early Christian Architecture, Byzantine, Romanesque and Gothic architecture.
- Indian : source of Islamic architecture in India, Imperial style,Provincial Style: Deccan, Jaunpur, Gujarat, Kashmir, Mughal.
- To Study various architectural elements, building techniques of specific architectural style.

Learning Outcome:

LO1: To understand architecture as evolving within specific cultural contexts including aspects of geographical location,politics, society, religion and climate.

LO2: Understanding of derivation of specific architectural elements construction techniques for local materials availability which became prominent architecture feature of those architectural style.

LO3: To establish a connection between religion and architecture and show how the concepts and beliefs have been manifested in a tangible form.

CONTENT & TEACHING UNITS

Unit	Content	HRS
A	**Early christian&byzantine architecture** Birth and spread of Christianity - early Christian worship. Study of architectural character, evolution of church form, building typologies, and building elements, baptisteries, early basilicas, churches. Development of early Christian church from roman basilica. Evolution of church forms. Development of the dome & pendentive in Byzantium.Typical church planning - 1.basilican concept: St. Clement, Rome; St. Peters,Rome, 2.centralized plan concept: S.Vitale, Ravenna; S. Hagiasophia,Constantinople; St. Marks, Venice.	8
B	**Romanesque & Gothic Architecture** Introduction to Romanesque architecture. Development of stone vaulting into groined systems - leading to development of church plan.Study of characteristics and typologies of Romanesque buildings. Understanding characteristics of Italian	12

	Romanesque Architecture: Central Italy: Pisa Cathedral, British Romanesque: Durham's Cathedral, French Romanesque:Abbaye-aux-hommes Introduction to Gothic architecture, its evolution of structural systems, arches, vaults and cross vault, decoration, characteristic of French architecture. : Notre - Dame, Paris, Chartes Cathedral. Understanding the general influences and characteristics of British & Italian gothic architecture and its structural developments and decorative motives. Characteristics of British gothic Architecture. Characteristics of Italian gothic Architecture :Milan Cathedral.	
C	**Islamic Architecture In India** I) Indo Islamic architecture –advent and earlier phase: advent of Islamic architecture in India – background, characteristic elements, typical buildings – mosques, tombs etc.; Imperial era: Slave kings: Qutub mosque, Qutubminar, Khilji dynasty:Alai Darwaya, TughlaqDynasty:Tomb of Ghiyas - ud - din Tughlaq, Sayyid and Lodi Dynasty -: Development of Octagonal & Square tombs:Mothi - Ki - Masjid. Ii) Provincial styles: Jaunpur: Jami Masjid of Jaunpur; Malwa - royal complex at Mandu; Gujarat: earlier period - Jami Masjid at Ahmedabad, middle period - Mosque at Champanir, evolution of Tombs, later period - Siddisayad mosque, Adalaj - step well; Outline idea of Bijapur style; Mughal architecture: Babur - eg. Humayuns Tomb – Delhi, Akbar - eg. Agra fort, Fathepursikri; Jahangir - eg. Akbar's mausoleum at Sikandra, Shah - Jahan - Eg. Red fort, Taj - Mahal - Agra.	12

PRE-REQUISITES:

Structure – I, II, III

OBJECTIVE:

- This subject is applications of structural engineering principles to design basic structural elements using of reinforced concrete as materials. This subject is specifically aim to develop understanding of various design philosophy, Indian codal provisions, design basis used in design of basic elements of framed structures and its detailing requirement.

Learning Outcome:

LO1: Analyse continuous beam and non-sway single bay single story frames using Moment Distribution Method.

LO2: Select various design philosophies to plan, to draw structural layout and to understand analytical approach to be used in the design of structural elements

LO3: Evaluate the loading conditions and to calculate loads as per IS Specifications

LO4: Propose design of basic structural elements like slab, beams, columns, staircase and foundation etc. using concrete as materials

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	**INTRODUCTION TO IS CODE:**Introduction to various load & load combinations, Use of IS code for loads, Introduction to 456-2000 for design of RCC element. Limit state of collapse & Serviceability: Safety factors for Material & Loading, Limit State of Flexure: Stress-Strain characteristics of Concrete & Reinforcing steel,	**04**
B	**DESIGN OF BEAMS:** Theory and Concept of different type of sections: Under reinforced, Over reinforced & Balance section, Neutral Axis depth, Moment of Resistance for singly reinforced and doubly reinforced beam. Design of singly and doubly reinforced beams.	**06**
C	**DESIGN OF COLUMN:**Definition, Classifications of column, Assumptions, Design of Short columns considering only axial load.	**06**
D	**DESIGN OF SLAB:**Types of Slab, loading transfer behaviors, Design of Simply supported One-Way and Two-Way Slab, Design of One way and Two-Way continuous slab.	**06**

E	**DUCTILE DETAILING:**Concepts of Detailing of various structural components as per IS: 13920 provisions. **BOND & ANCHORAGE, DEVELOPMENT LENGTH, LAP LENGTH.:** Development length L_d, Bond stress ,Anchoring of reinforcement.	**04**
G	**DESIGN OF STAIRCASE:**Introduction, Concepts of different types of staircases based on structuralbehaviors, Calculation of trade and riser, Design of waist slab type staircase.	**04**

Pre-requisites:

Introduction to all basic Mechanical system of buildings,to understand the co relation of services with building to run the services smoothly.

Learning Outcome:

LO1:Understand the networking of all mechanical components of including to understand the working cycle to be generated through the usage of equipment and appliances

LO2: Apply acquired knowledge to importance of natural and artificial lighting ,resources for the both types of lighting arrangement which are the most important requirement of the built environment

LO3:To adapt newer and latest technology and equipment's for modern and fundamental requirement of Information and communication

LO4: High tech applications and services to be implemented for all type of functional areas like residential, commercial, corporate and Industrial.

Theory syllabus

Unit	Content	Hrs
1	Acoustics Properties of sound, process of hearing, behavior of sound, acoustics for various spaces/ functional areas, noise control, outdoor and indoor sound input/output systems, noise control of building materials, prediction methods and calculations, noise reduction, properties of materials for sound insulation, testing, room acoustics, reverberation time in functional areas.	08
2	Air conditioning Different systems in current use from chilled water cooling systems to air handling package unit etc; their installations requirements and demand in building layouts. Supply air, return air ducting systems, their layouts and requirements along with building systems.	08

3	Building Automation Concept and application of Automation and Management System; Design issues related to building automation and its effect on functional efficiency; Components of building automation system; HVAC, electrical, lighting, security, fire-fighting, communication etc.; Integrated approach in design, maintenance and management system; Current trend and innovation in building automation systems; Impact of Information Technology; Concept of artificial intelligence; Application of expert system in building automation; Stages in development of expert system, expert system application in architecture; Computerizing building management information.	10
4.	Building Security Systems Concept of Building security Systems; Design issues, Components, Integrated approach in design, maintenance and management, Current trend and innovation, Application.	06
Practical content		
Site visits & Case studies for Acoustics , Building Automation system , Building security system. Market surveys of types of Air conditioning system available in the market with its proper working criteria and functions and also add the upgradation coming in the system.

Objective:

- Methods of Database gathering and analysis to find out opportunities for site planning.
- Understanding Principles of site planning, relation between built and up-built spaces.
- Design integration of different services to the site and the building, and incorporation of by-laws.

Learning Outcome:

LO1: Understanding of the methods of preparing and reading graphical representation of site.
LO2: Ability to use analytical database to propose appropriate site planning.
LO3: Ability to integrate services like drainage, water supply, storm water, electricity, etc. and by-laws in to the site planning.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Introduction of Effective Site planning parameters: Analysis in terms of ecological and geomorphological parameters. Use of By-laws and other regulatory body.	12
2	Introduction Services affecting the site planning, like drainage, water supply, storm water, electricity, etc.	6
3	Relation between typology of buildings and its effects on site planning. Residential, commercials, public buildings, etc.,	10
4	Site planning alternatives for different building typologies. Landscapes, margin spaces designs, pavements, roads and common area developments.	10
5	Effects of site planning on the surrounding contexts. (through various case studies)	8
6	Exploring site planning for different building typologies with design exercises	18

Objectives:

To understand the art movement during prehistorically period to Morden period and impact on the style of art during different periods and social contexts. Study of style of art of different periods and creating some art work on the basis of studies.

Learning Outcome:

LO1: Thorough understanding and analysing art of different periods

LO2: Explore the style of art during different periods through examples in terms of material and technique

LO3:recreate or create some art works on the bases of art analytical studies.

Theory syllabus

Unit	Content	Hrs
A	Study the style of art during prehistorical period to modern period through art works	4
B	Studies of art movement like realism, impressionism, expressionism, cubism surrealism etc. through study of style of work and material and technique	8
C	select some art works of the selected artist from different periods, study and analysis the style and technique of the particular work in terms of methodology and theme on which work of art is based	8
D	Recreating some of selected art work from the different periods and recreate on the basic of previous analytical studies of methodology and theme of the painting by using appropriate art medium	6
E	now creating some of unique art work studies with student's imagination and exposure which has been obtained from the analytical studies of different art works and recreation of paintings in previous exercise.	6

Practical content

Exercises based upon above topics. Models, installations and artworks

Objective

To enable the students to prepare working drawings of an architectural project and imbibe the significance of working drawings from the point of view for execution of the work on site and as important component of tender documents.

Learning Outcome :

LO1: Understanding the difference between conceptual drawing and execution drawing for the site work. Scope and limitations of a different construction material.

LO2: To learn construction method according to different material and represent them into the execution drawing accordingly.

LO3: To resolve minimum compensate with the architectural quality of space when structure of a space comes into a play.

LO4: To resolve and understand various details of staircase, door window of different materials, techniques and finishes and represent them efficiently into the detail execution drawing.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	Introduction to the concept of working drawings and their importance. Graphical presentation of all the components of a building along with dimensioning and annotations. Understand and apply IS Codes and internationally accepted norms / methods of preparing a working drawing along with tabulation of schedules of materials, finishes and hardware.	42
2	Design development and detailing of own design to resolve the design idea to the one which can be executed/ constructed, exposing students to construction parameters, limitation and sequencing.	42

3	Generating a working drawing set for the chosen design/ building with framed/ composite construction including various components and accessories Produce a complete set of working drawings for a chosen design building showing an understanding of structural systems and building engineering services including electrical, PHE, HVAC, Lifts and escalators, Fire safety etc., Interior and Exterior finishes etc.	140

Objective:

- The primary focus is on interiors of the building and application method according to the materials, usage and aesthetics.
- Students will develop application based understanding of the relationship of interior to construction systems and techniques.
- Understanding contemporary building materials and its application in a building along with its techniques used in different forms and joinery details of construction.

Learning Outcome:

LO1: Understanding contemporary building materials and their application in a building.

LO2: Recognizing different interior related elements based on their materials and its form and application surface.

LO3: Understanding modular design as a modern techniques and its construction techniques.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Introduction to Glass as building materials its manufacturing process, types, properties, behavior and failure in different circumstances and application in a building. Introduction to materials like Aluminum Composite Panels (ACP), PVC, CPVC and UPVC and their use in construction.	18
3	Understanding different types of partitions, wall paneling, cladding and Dry wall Technology used in building- their types and methods of construction using various	24

	materials.	
4	Understanding different types of paints and Wall finishes with different materials and techniques of application; Use and different types of curtains and blinds	12

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DEISGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	VI					Version	2.0.0.0		
Effective from Academic Year		2021-22				Effective for the batch Admitted in			June 2019
Subject code	2VIA03HOA	Subject Name				History of Architecture-V			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- To understand the terms modern, modernity, modernization and trace its meaning and Western : To study and understand cultural, social, geographical aspects which influenced and played vital role in development of the following eras Early Christian Architecture, Byzantine, Romanesque and Gothic architecture.
- Indian: source of Islamic architecture in India, Imperial style, Provincial Style: Deccan, Jaunpur, Gujarat, Kashmir, Mughal.
- To Study various architectural elements, building techniques of specific architectural style.

Learning Outcome:

LO1: To understand architecture as evolving within specific cultural contexts including aspects of geographical location, politics, society, religion and climate. They have a comprehensive knowledge about the philosophy of different eras and how they influenced architecture.

LO2: Understanding of derivation of specific architectural elements construction techniques for local materials availability which became prominent architecture feature of those architectural style.

LO3: 3. The development of construction technology in that period, Architectural ornamentation of that period. To establish a connection between religion and architecture and show how the concepts and beliefs have been manifested in a tangible form.

CONTENT & TEACHING UNITS

Unit	Content	HRS

A	**Architecture of the Western World** Viennese secession, Adolph Loos and debates on ornamentation; Futurism, Expressionism works of Mendelssohn &Taut, Cubism, Constructivism, De stijl and their influence on Architecture. Bauhaus school & Walter Gropius, Modernism and the International style. International style: Oversimplification of the modern Movement into functional, steel and glass, cubes. Monotonous functionalist abstractions and Modernism as a style. Disenchantment of modern cities and fall of modern Movement.	12
B	**Architecture of the Indian sub-continent** The styles and trends of colonial architecture in India. Looking in depth in to styles of British, French, Dutch, Portuguese architecture and its influences in India and their evolution. The impact of Hindu and Indo- Sarsanic style on the British architecture in India. The characteristics of British colonial architecture with examples from the works of Edwin Lutyen. The impact of International style of architecture in India, Early public buildings such as Vigyan Bhawan Supreme Court building etc. The works of Le-Corbusier and Louis Kahn in India with examples. Their impact on architecture of fifties and sixties architecture style.	10
C	**Works of Modern Masters in Indian sub-continent** The trend in Indian architecture after 1970 Principles and works of the following architects: Balakrishna Doshi, Charles Correa, Anant Raje and Laurie Baker, Achyut Kanvinde, Raj Rewal with suitable examples. Building Material in contemporary	10

Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	VI					Version	2.0.0.0		
Effective from Academic Year			2021-22			Effective for the batch Admitted in			June 2019
Subject code	2VIA04SDS		Subject Name			Structural Design and Systems VI			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture (DT)		Practical (Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

OBJECTIVE:

- This subject is applications of structural engineering principles to design basic structural elements using of steel as materials.
- This subject is specifically aim to develop understanding of various design philosophy, Indian codal provisions, design basis used in design of basic elements of steel frame structures and its detailing requirement.

LEARNING OUTCOME**:**

LO1: Understand various design philosophy to be used in the design of structural elements.
LO2: Evaluate the loading conditions and to calculate loads as per IS Specifications.
LO3: Explain various design philosophies understand analytical approach to be used in the design of structural elements.
LO4: Propose design of basic structural elements like connection, slab, beams, columns, truss and foundation etc. using steel as materials using limit state approach.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
1	**INTRODUCTION:** Mechanical properties of Structural Steel, Structural Sections- rolled beams, channels, angles, etc. Loads & load combinations, Methods of Analysis, Codes & specifications, Design Philosophies - Working stress Method, Ultimate Load Method, and	02

	Limit State Method.	
2	**TYPES OF CONNECTIONS (RIGID AND PINNED CONNECTION):** Bolted Connections- Definition of riveted joints, rivet strength and capacities, Design of Bolted Connections. Welded Connections - Weld shapes, types and symbols allowable stresses in weld material, Fillet and Butt weld, Design of Welded Connections. Design of simple connections such as lap and butt joints, truss joint connections.	04
3	**AXIAL FORCE DESIGN: Tension member-** types of tension member, behavior, modes of failure, Slenderness ratio. Analysis and design of axially loaded tension member made up of angle section, splices, Lug angle.	04
4	**COMPRESSION MEMBER-** behaviour, classification of sections, possible modes of failure, elastic buckling of slender member, design of compression member having single & built-up section. Importance of bracing: Objectives of lacing, single lacing, double lacing, IS-800-2007 requirement for lacing system. Objectives of batten. IS-800-2007 requirement for battening system. Columns with lacing and battens.	06
5	**DESIGN FOR BEAMS AND BEAM-COLUMNS:** Type of sections, classification, Lateral stability, Design strength of laterally restrained and unrestrained beams, shear strength, deflection, web buckling & crippling, Design of simply supported beam. Combined axial and flexural design of member (Beam-Column)	06
6	**DESIGN OF A SIMPLE ROOF TRUSS:** Steel trusses, its types, geometry, spans, pitches, spacing etc. Various loads on a roof truss. i.e., Dead, Imposed & Live Load. Analysis & Calculation of Dead load, Live load & wind Load. Analysis of a truss under various loads and Design of a truss members.	06
7	**DESIGN OF FOOTING:** Introduction to footings for steel columns, Slab based and gusseted based. **CONCEPTUAL STUDY OF GENERAL CONNECTIONS:** Beam to beam connections, Beam to column connections, Column to column connections, and Column to foundation connection.	04

Objective:

Introduction to Toilet and Kitchen in detail.

Learning Outcome:

LO1: Understanding the importance of each service in details with its designing criteria, its standards measurements, its appliances measurements through live case studies and onsite drawings.

LO2: To adapt newer and latest technology and equipment's for modern and fundamental requirement of this services and also High tech applications and services to be implemented for all type of functional areas like residential, commercial, corporate and Industrial.

LO3: The brief understanding and importance of Toilet and Kitchen services in our routine life and how we can smoothly design it with the help of details study about the services.

LO4: The brief understanding of how to read and make the working drawings of the following services on site and the importance of this drawings in professional field.

Theory syllabus

Unit	Content	Hrs
1	Toilet details : Concept and application of Toilet layout, Types of Toilets according to the use of the toilet, Systemic approach of its Design, its appropriate size, shape etc varies according to its use and design, its section and Tiles details	16
2	Kitchen Details : Concept and application of Kitchen layout, Types of Kitchen, Systemic approach of its Design, its appropriate size, shape etc varies according to its use and design, its platform Details using sandwich platform, sections, Sizes of all appliances used in the kitchen.	16

Objective:

- The primary focus is to introduce the students to Landscape architecture & its relevance and impact on Architecture.
- Students will understand the relationship between the built and the un-built neighbourhood
- To develop the understanding of students regarding site and site planning

Learning Outcome:

LO1: Understanding use site analysis information to propose appropriate site planning and landscape design.

LO2: Recognizing ecological and geomorphological characteristics of a site.

LO3: To develop the skill to integrate landscape with the built form

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Ecosystem And Landscape: Introduction to Landscape Design and its History, Information about different types of trees, Plants, shrubs, grass and creepers, Drawing and representation of landscape and elements of it, evolution of scales & type of landscapes over time, Effect of landscape elements on Climate and Architecture.	10
2	Site analysis: Learning about topography and prevailing features; natural slopes and drains; soil types; survey of existing vegetation and tree, Relation between soft scape and hardscape and transitional spaces	06

3	Landscape design: Landscape principles and elements of landscape design; history of garden design; principles of landscape development; plant selection and its placement in landscape.	08
4	Execution of Landscape design: Introduction to irrigation system and techniques to grow plants, indicating the use of different landforms and application of various materials and street furniture in a landscape in accordance with immediate surrounding	08

Objective:

- Introduction to Conservation and Architectural Conservation.
- Emergence of Conservation as a Subject and as a Profession
- To understand the basic Principles of Conservation.
- Understanding form global and Indian case studies.

Learning Outcome:

LO1: The recognition and protection of the historic environment to gain awareness

LO2: Understands the techniques and the theoretical framework to protect Cultural Heritage.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Introduction to Programming of Architectural Conservation Projects Appreciation and Identification of Values related to Heritage and Culture – their Interpretation and Presentation; Concept of Ethics and Authenticity; Degrees of Intervention; basic Principles of Conservation viz., Preservation, Restoration, Reuse, Rehabilitation, Regeneration, Revitalization, Up gradation, Redevelopment	06
2	Emergence of Conservation as a Subject and as a Profession – History of ASI; History of Conservation Movement in UK, Italy; History of Conservation Movement in	06

	India	
3	Global and National Heritage Management Notions – Conservation Legislation in India vis-à-vis that in Europe; World Heritage Sites – recognition criteria, status after inscription; ICOMOS Charters e.g., Venice, Burra, Florence; Pilot Projects of Architectural Conservation in India and Europe	08
4	History, Theory and Criticism of Architecture – Re-introduced as a view point to understand built heritage of India.	06
5	Developing an appropriate methodology for qualitative assessment of a heritage resource and suggest relevant strategies for interpretation and presentation.	04
6	Critical Judgment of architecture through traditional, historical and contemporary examples and case studies.	02

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DESIGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	VI					Version	2.0.0.0		
Effective from Academic Year		2021-22				Effective for the batch Admitted in			June 2019
Subject code	2VIB08SP	Subject Name				SUMMER PROGRAMME-III			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	NA					Theory			
Hours	**1.5 / 2 Week, Block Course**					Practical	ATTENDANT/ NOT ATTENDANT		

Objective:

The Summer Programme (SP) at the Institute of Architecture is a unique contribution to Architectural education. Initially called measure drawings, it is intended to take the students out into the field to get first-hand experience of traditional built environments. This subject recognizes the value of the traditional architecture as well as the importance of field experiences and travel in the learning of architecture. The students are encouraged to learn about not only the architectural form also related components of architectural relevance.

Learning Outcome:

LO1: Students will get the understanding of "synthesis of learning from various courses" by observing; registering & mapping of actual built buildings.

LO2: Programme outcome will be extremely valuable in creating knowledge base on architecture field not only in India but of nearby countries as well.

LO3: Production of Accurate and precise drawings of many a monument, institution, settlement in India, which become a basis for future research.

CONTENT

Unit	Content	HRS
	This summer workshop aims at creating understanding of inherent form and order in the built environment by observing it and analyzing by sketching and measure drawing. Hand sketch also gives an opportunity to students for examining the systems, scale and architectural language of the built. Students came back at institute and make the final Drawings and report within remaining days.

Objective

Exploring Architectural Design Process to Understand character of Institution.

Learning Outcome:

LO1: Spatial Relations of Spaces and Understanding the scale of the project

LO2: Methods of Space programming, analysis, evaluation of design criteria and fundamentals of composite site planning.

Theory syllabus

Unit	Content	Hrs
1	Analytical case studies of Institutions in different cultures and time periods Study of Organization and Disposition of Spaces. Methods of space programming; Behavioural Study, Formulation of design criteria.	30
2	Site analysis and design concepts, application of climatic data, socio-cultural factors, behavioural aspects and structural considerations, Application of building services, Design evaluation. Relationship of different functional, services and movement areas.	32
3	Analysis of Site Planning, Zoning, layout, circulation, landscaping with Diversity of user groups, circulation routes. User group needs and client requirements.	45
4	Design of an Institution of Medium Level complexity with various Functions Developing an Idea of an Institutional image and character Application of Ordering Principals / idea / concept. *Design To be Prepared keeping working drawing exercise in View.	85

Hours	2	-	2	2	6	Practical	40	60	100

Objective:

- The main objective of this course is to impart the principles of designing different structural elements of a building based on their functions and applications.
- Students will develop application based understanding of different types of construction system.
- Understanding various building elements and its use in a building along with the techniques used in different forms of construction.

Learning Outcome:

LO1: Understanding various types of foundations and its application in the building according to the appropriate selection criteria

LO2: Understanding about various roofing system and its construction details

LO3: Recognizing various types of forces acting on different types of water tanks/swimming pools and its construction techniques

LO4: Understanding various treatments required in the building like – water proofing and termite proofing.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Understanding Foundation System- types of foundations and factors affecting its selection. Introduction to Shallow and Deep foundation, underpinning, excavation support systems, spread footing, foundation walls, column footing, pile foundation, pile foundation, caissons foundation- their types, functions and method of construction/ installation etc.	12
2	Learning about Site development- Compound wall and Gates- their use and construction method using different materials	12
3	Studying Tensile and Long span structures, Shell structure, folded plate structure, Suspension Structure, tensile structure, space Frame- purpose, construction techniques with details and their use	12
4	Studying construction of Geodesic dome- purpose, construction technique and erection	24
5	Understanding underground, overhead/internal storage tanks and swimming pool- their use, capacity, loads and construction technique	24

6	Learning about water proofing and termite proofing treatments in a building	12

Objective:

- To Learn the evolution of world architecture took place at different region in different era of time line in a chronological order
- Western: To study and understand cultural, social, geographical aspects which influenced and played vital role in development of the following era's renaissance, baroque, rococo, neoclassical, art Nouveu, art deco.
- To Study various architectural elements, building techniques of specific architectural style.

Learning Outcome:

LO1: To understand architecture as evolving within specific cultural contexts including aspects of geographical location, politics, society, religion and climate. They have a comprehensive knowledge about the philosophy of Renaissance and how they influenced architecture in England and France.
LO2: Understanding of derivation of specific architectural elements construction techniques for local materials availability which became prominent architecture feature of those architectural style.
LO3: The development of construction technology in that period, Architectural ornamentation of that period. To establish a connection between religion and architecture and show how the concepts and beliefs have been manifested in a tangible form.

CONTENT & TEACHING UNITS

Unit	Content	HRS
A	**Renaissance, Baroque, Rococo** Renaissance in Florence and the reasons thereof; Counter-reformation; the Baroque movement and its impact on Architecture and other Visual Arts. Renaissance and Baroque Architecture of Italy and in other parts of Europe. Italian Renaissance - The idea of rebirth and revival of art - Outline of the Architecture during the early Renaissance, High Renaissance and Baroque Periods - Features of a typical Renaissance palace, eg. Palazzo Ricardi. Study of the contribution of the following architects: Brunelleschi, Michelangelo, Andrea Palladio, Example - St. Peter Rome, Villa capra in Vicenza. Architectural character in the Rococo period - Example - Chateau de Chambord, Louvre, Paris -Domestic British architecture- Study of the works Sir Christopher Wren, & Inigo Jones, Example - St. Paul's Cathedral, London. Banqueting House, Whitehall.	12

B	**Neoclassicism, Eclecticism** Palladian Architecture -- Palladio's architecture; The Palladian window; Early Palladianism; Neo-Palladian – English Palladian architecture, Irish Palladianism, North American Palladianism, Eastern European Palladianism; Decline of Palladianism. Neoclassical Architecture -- Origins; Characteristics; Regional trends -- Spain, Polish-Lithuanian Commonwealth; Interior design; City Planning; Late phase -- United States; Neoclassical Architecture in Washington D.C and Virginia. Key Concepts, History, Ancient Roman Influence -- Political, Aesthetic, Intellectual; Notable Examples; List of other architectural institutions (throughout the United States)	8
C	**Art Nouveau, Art – deco** Arts & Crafts movement in Europe and America; Art nouveau, and the works of Horta, Guimard, Gaudi and Macintosh; Organic Architecture -Early works of F.L. Wright. Chicago school; Art deco Architecture in Europe and America.	12

Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

PRE-REQUISITES:

Structure design and system – I, II, III, & IV

OBJECTIVE:

- This subject is applications of structural engineering principles to design basic structural elements using of reinforced concrete as materials. This subject is specifically aim to develop understanding of various design philosophy, Indian codal provisions, design basis used in design of basic elements of framed structures and its detailing requirement.

Learning Outcome:

LO1: Behaviours and requirement of various types of foundation and requirement effect of ductile details in structure.
LO2: Select various design philosophies to plan, to draw structural layout and to understand analytical approach to be used in the design of structural elements
LO3: Design & detail RC structures like Retaining Wall.
LO4: Apply the concept of earthquake resistant design in the building.

CONTENT & TEACHING UNITS

Unit	Content	Hrs
A	**DESIGN OF FOOTING:** Definition, Types of footings based on structural requirements, importance of soil & other factors while recommending type of foundation. Design of Isolated footing Considering only Axial load.	06
B	**BUILDING LAYOUT AND DESIGN:** Loads as per I.S., distribution & flow of loads, lateral load due to wind and seismic as per latest IS standards, load combinations, guide lines for preparation of structural layout for building. General detailing required in structural drawing as per SP-34, do's details required for general drawing, beam, slab and column as per SP-34.	08
C	**DESIGN OF RETAINING WALL:** Types, behaviour and application of retaining wall, stability criteria, design & detailing of cantilever type retaining wall for various ground conditions	06
D	**DESIGN OF WATER TANK:** Underground and elevated circular and rectangular water tanks retaining walls.	06

E	**SPECIAL TOPICS:** Introduction to Earthquake Resistant Features of unreinforced & reinforced masonry Structure, Confined Masonry, Soil liquefaction, Structural controls, Seismic strengthening. Earthquake resistant features: bands and vertical reinforcement IS 4326, IS 13827, IS 13828.	06

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	INSTITUTE OF ARCHITECTURE
Semester	V	Version	2.0.0.0
Effective from Academic Year	2021-22	Effective for the batch Admitted in	June 2019
Subject code	2VA05BS	Subject Name	Building Services-III

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Pre-requisites:

Introduction of all types of main building services into which the building design and working depends.
Introduction of rain water harvesting, details of drainage system, and details of plumbing systems.

Learning Outcome:

LO1: Understand the networking and supply chain of all services including to understand the working cycle to use the system properly and smoothly.
LO2: Understanding the importance of each service in details with its designing criteria through live case studies and onsite drawings.
LO3: To adapt newer and latest technology and equipment's for modern and fundamental requirement of this services and also High tech applications and services to be implemented for all type of functional areas like residential, commercial, corporate and Industrial.
LO4: The brief understanding and importance of solid waste management through the understanding of drainage system should be provided.

Theory syllabus

Unit	Content	Hrs
1	Rain water harvesting : Its importance in today's life, design to collect the water, Norms and principle of rain water harvesting , its Advantages and Disadvantages, The rule according to GDCR	10
2	Drainage system : Concept of drainage system, Understanding of Its importance, How to maintenance the drainage system, its Design, Collection of all sort of Grey water, Waste water, Rain water, Importance and sizes of proper pipes, types of pipes, suing in different drainage systems.	10
3.	Plumbing system : Concept and its importance of plumbing system, All Trap systems, Importance of Nally trap, Gully trap, Main hole, Inspection chamber., its Maintenance, All thumb rule to provide proper plumbing system etc. Section of Water coming from Main tank to your home, Water coming from overhead water tank to your home.	12

Practical content

Site Visits & Case Studies of above topics. Presentations, Movies, Debates & Discussions related to

the above syllabus.

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE DEISGN & PLANNING

Programme	Bachelor of Architecture					Branch	INSTITUTE OF ARCHITECTURE		
Semester	V					Version	2.0.0.0		
Effective from Academic Year	2021-22					Effective for the batch Admitted in			June 2019
Subject code	2VA06BES		Subject Name			Building Estimation and Specifications			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture (DT)		Practical (Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Pre-requisites:

Building Construction

Objective:

To develop basic understanding the importance of estimate and designing of specification to achieve the best in terms of cost efficiency and standards.

Learning Outcome:

L01. After learning the course, the students should be able to: Work out the estimated cost of any proposed civil engineering structure and

L02. After learning the course, the students should be able to: Work out the value of any old structure

L03 To understand and prepare SOR for various organizations.

L04. To fill up tenders for various construction works.

Theory syllabus

Unit	Content	Hrs
A	**INTRODUCTION:** Purpose and importance of estimation, role of surveyor works. Types of estimates approximate estimating techniques for various civil engineering works, reading of working drawings, ISI code for measurements.	04
B	**ESTIMATION OF BUILDINGS:** Definition, Units of measurements, types of estimates, Different methods to find the quantities of civil works. Estimated cost and its importance. Provisions of IS-1200, for working out quantities and deductions in civil works. Entering the measurements in quantity sheet and calculation of quantities of various items of civil works of small residential building (concrete, Steel, Shuttering, brickwork, wooden work), and Small Industrial Shed with Market rates of material and labour, Introduction to schedule of rates, Entering quantities and rates in abstract sheet, calculation of estimated cost.	15

	Estimate of Septic Tank, Soak Pit, Sanitary item – Plumbing, Electrification. Rate analysis of all major items to be prepared.	
C	**ANALYSIS OF RATES** Definition of rate analysis, Definition of task, Determination of man power and material requirement for a given quantity of items of civil works, study of present wages of labour and prices of material in the market. Study of market rents of different construction equipment, Determination of rate of item of civil work. Working out rates of various items of civil works like 10 m 2 plaster,10 m 3 1:2:4 plain and reinforced concrete, 10m^3 brick work etc.	05
D	**ABSTRACTING AND BILLING:** Abstracting methods relevant to ISI standards, preparation of abstract statements, cost analysis and statement.	04
E	**SPECIFICATIONS:** - Definition, importance of specification, Types of specification, Care to be taken while drafting specifications, Drafting general specifications, and detailed specifications for various civil work items.	04

Practical content	
Study through practical site visits, presentations, case studies, tutorial, study of BOQ & workshop based on the application of theory to construction field.

Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective:

- Introduction and Understanding Disasters.
- Types, Trends, Causes, Consequences and Control of Disasters.
- To understand the Disaster Management Cycle and Framework.
- Understanding Disaster Management in India.
- Applications of architecture and urban planning solution for Disaster Management & Mitigation.

Learning Outcome:

LO1: Understand disasters, disaster preparedness and mitigation measures
LO2: Understand disaster management acts and guidelines along with role of various stack-holders during disasters

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Understanding the Concepts and definitions of Disaster, Hazard, Vulnerability, Risk, Capacity – Disaster and Development, and disaster management	06
2	Geological Disasters (earthquakes, landslides, tsunami, mining); Hydro-Meteorological Disasters (floods, cyclones, lightning, thunder-storms, hail storms, avalanches, droughts, cold and heat waves); Biological Disasters (epidemics, pest attacks, forest fire); Technological Disasters (chemical, industrial, radiological, nuclear) and Manmade Disasters (building collapse, rural and urban fire, road and rail accidents, nuclear, radiological, chemicals and biological disasters); Global Disaster Trends – Emerging Risks of Disasters – Climate Change and Urban Disasters	06
3	Disaster Management Cycle – Paradigm Shift in Disaster Management Pre-Disaster – Risk Assessment and Analysis, Risk Mapping, zonation and Microzonation, Prevention and Mitigation of Disasters, Early Warning System; Preparedness, Capacity Development; Awareness During Disaster – Evacuation – Disaster Communication – Search and Rescue – Emergency Operation Centre – Incident Command System – Relief and Rehabilitation – Post-disaster – Damage and Needs Assessment, Restoration of Critical Infrastructure – Early Recovery – Reconstruction and Redevelopment; IDNDR, Yokohama Strategy, Hyogo Framework of Action	08
4	Disaster Profile of India – Mega Disasters of India and Lessons Learnt Disaster Management Act 2005 – Institutional and Financial Mechanism National Policy on Disaster Management, National Guidelines and Plans on Disaster Management; Role of Government (local, state and national),Non-Government and Inter-Governmental Agencies	06

5	Disaster Communication System (Early Warning and Its Dissemination), Land Use Planning and Development Regulations, Disaster Safe Designs and Constructions ,Structural and Non Structural Mitigation of Disasters	06

Objective:

- Understanding the details and grip over the various graphical and 3D software for advance presentation and skills through rendering mediums as well. SketchUp, CorelDRAW, Photoshop, Illustrator, etc.

Learning Outcome:

LO1: Understanding the software and its application as a whole.
LO2: Learning the applications for various off purpose.
LO3: Learning the rendering process of the created model.
LO4: Overall learning presentation through the dedicated software medium.

CONTENT & TEACHING UNITS

Unit	Content	HRS
1	Introduction to the software-purpose, application, techniques with the whole idea of the final output.	06
2	Learning various commands with their specific task and understanding their output for the design.	06
3	Combination of the various commands for the task and continuous repetition of the commands for the better grip and fluency.	06
4	Introduction to the various rendering software with the application and its application over the created model with views, Light, shadows as required.	08
5	Final presentation with use of combination or single software.	06

GANPAT UNIVERSITY									
FACULTY OF ARCHITECTURE DESIGN & PLANNING									
Programme	Bachelor of Architecture					Branch/Spec.	INSTITUTE OF ARCHITECTURE		
Semester	V					Version	2.0.0.0		
Effective from Academic Year		2021-22				Effective for the batch Admitted in			June 2019
Subject code	2VA09RSP	Subject Name				Related Study Programme II			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	NA					Theory			
Hours	**1.5 / 2 Week, Block Course**					Practical	ATTENDANT/ NOT ATTENDANT		

Objective:

The Related Study Programme (RSP) at the Institute of Architecture is a unique contribution to Architectural education. Initially called measure drawings, it is intended to take the students out into the field to get first-hand experience of traditional built environments. This subject recognizes the value of the traditional architecture as well as the importance of field experiences and travel in the learning of architecture. The students are encouraged to learn about not only the architectural forms also related components of architectural relevance.

Learning Outcome:

LO1: The Students will develop the skills & understanding of measure drawing.
LO2: Students will get the understanding of "synthesis of learning from various courses" by observing; registering & mapping of actual built buildings.
LO3: Programme outcome will be extremely valuable in creating knowledge base on architecture field not only in India but of nearby countries as well.
LO4: Production of Accurate and precise drawings of many a monument, institution, settlement in India, which become a basis for future research.

CONTENT

Unit	Content	HRS
	• Student and faculty members stay at the selected Village for 6 to 9 days. • Students will get comprehensive awareness of that settlement. • Students will measure the built environment in terms of a small/medium scaled institutional building inside a campus. • Students will also documents the social, cultural, environmental aspects along with the connectivity, access, interactive spaces and Impact of the built form on surrounding • Students came back at institute and make the final Drawings and report within remaining days.	6 to 12 Days

Hours	-	-	16	-	16	Practical	40	60	100

Objective

Designing Housing or public spaces in Urban context:
Architecture & Urbanism projects at the city level This Design studio addresses predominantly urban issues such as Housing, Urban Design, and Conservation. Though the emphasis is on the study of existing problems in our cities, scholars will be encouraged to strive for innovative architectural solutions for the same. Teamwork will be required to undertake such projects & hence the ability of the student as a team player will be critical.

Learning Outcome :

LO1: Knowledge of various issues and complexities of providing shelter for people from different socio-economic and socio-cultural backgrounds in an urban setting and exposed them to current issues and aspects of urban housing.
LO2: Ability to appreciate the challenges of bigger scale site planning involving a group of buildings, space programming, complexities of providing building services and infrastructure facilities, and economic feasibility.
LO3: The scholar gets exposure to urban design issues at the city level & the strategies that are commonly employed.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	The various housing projects in a typical urban scenario can be taken with suitable design parameters established after conducting a rigorous study. Analysis of existing design trends & user preferences needs to be ascertained. Awareness about special building bye-laws applicable for Group housing schemes is essential. In addition to design issues such as security, accessibility, identity, social interaction, comfort, economy etc. would be investigated. The application of Fractals in design can also be explored. Ex. Housing for the poor /Slum dwellers, Multi-storied apartments for Govt. / corporate employees, Multi-storied condominiums for the rich etc. **OR** Urban design projects could deal with the redevelopment of problem areas such as riverfronts, beach fronts, market areas, bazaars or commercial & residential districts	256

	that have reached dead-end situations. It could also deal with emerging transportation nodes with its surrounding areas, the design of city-level open spaces such as parks, plazas etc. Alternatively, conservation strategies for heritage areas along with revitalization techniques can also be attempted. The projects are thus undertaken as group work will have to ultimately contribute ideas for the improvement of the quality of the urban environment.

Objective

This course emphasizes understanding of advanced materials and construction technologies with respect to current global trends in the building industry. The course also focuses on a detailed study of sustainable Building Systems, material sciences and technological know-how. The intention is to study futuristic concepts of built environments with respect to innovation in material applications. The course will also concentrate on Computational design technologies and structural systems to achieve a variety of complex structures for different functions.

Learning Outcome :

LO1: To understand advanced Building Technology to accommodate Hi-tech & sustainable aspects.
LO2: Explore advanced materials and understand their properties and application in building construction.
LO3: Explore advanced construction technology with its structural complexities and behaviour.
LO4: Integrate advanced materials and construction technology to analyse Building Performance with respect to climate, structure, construction challenges, application of appropriate materials and life cycle assessment.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	Drywall Technology in Building facades - methods, types, specifications, materials, case studies.	12
2	Glass Buildings - case studies, safety & privacy, climatology, Elements of glass in Roof and wall, Aesthetics & Reflective uses.	12
3	High-rise Buildings, Tall structures - Materials, service Ducts, Construction Techniques, Foundations, Wind & Load design, Seismic Loads, Elements of Design.	12
4	Construction of energy-efficient Buildings. Hi-tech Services, Use of solar & wind energy, Use of Natural Light in Interior spaces, Techniques & Equipments,	12
5	Smart Buildings / Intelligent Buildings - Case studies.	8

6	Value Engineering & material Selection - New materials, Economics of material use, Cost v/s quality & Function v/s Use.	8

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE, DESIGN & PLANNING

Program	Bachelor of Architecture	Branch/Spec.	ARCHITECTURE
Semester	VII	Version	2.0.0.0
Effective from Academic Year	2022-23	Effective from the batch Admitted in	June 2019
Subject code	2VIIA03THS	Subject Name	Theory of Human Settlements

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	3	-	-	-	3	Theory	40	60	100
Hours	3	-	-	-	3	Practical	-	-	-

Objectives

- To introduce the vocabulary, elements, and classification of human settlements.
- To appreciate the significant factors influencing the development of human settlements.
- To give exposure to planning concepts at different scales of settlements.
- To acquire high-level skills in the analysis of the various growth patterns historically observed in human settlements

Learning Outcomes

LO1: Understand the dynamics of the development of human settlements.
LO2: Analyze the growth trends of Human settlements.
LO3: Appreciate and reconcile the different land use patterns in human settlements.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	**INTRODUCTION TO HUMAN SETTLEMENTS** Introduction to planning as a discipline and brief evolution of the profession. Elements of human settlements, Human beings, and settlements, Anatomy, and classification of human settlements – locational, resource-based, population size, and occupational structure.	6
2	**FORMS OF HUMAN SETTLEMENTS** Structure and forms of settlements – linear, non – liner and circular, combinations, and reasons for the development. Advantages and disadvantages, case studies, to understand the factors influencing the growth and decay of human settlements.	12
3	**THEORIES OF URBAN GROWTH AND URBAN LAND USE** ● Concentric Ring Model (Ernest W. Burgess, US) ● Concentric Zone Model (Peter Mann, UK) ● Multiple Nuclei Model (Edward Ullman and Chauncy Harris) ● Sector / Radial / Axial Model (Homer Hoyt) ● Inverse Concentric Zone (Third World Countries) ● Hybrid Model (Walter Isard)	15
4	**URBAN PATTERNS IN INDIAN CITIES (CASE STUDY)** ● Colonial City – Madras, Calcutta, Bombay	15

	● Planned City – Madurai, Auroville, Pondicherry, Amaravati, Gandhinagar, Jaipur, Fatehpur Sikri, Bidhannagar, Chandigarh, Gurgaon, New Delhi,

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE, DESIGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	ARCHITECTURE
Semester	VII	Version	2.0.0.0
Effective from Academic Year	2022-23	Effective from the batch Admitted in	June 2019
Subject code	2VIIA04CPM	Subject Name	Construction Project Management

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture (DT)		Practical (Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	3	-	-	-	3	Theory	40	60	100
Hours	3	-	-	-	3	Practical	-	-	-

Objective

Architectural projects are a combination of creation and order, the famous dialogue between form and function. The knowledge obtained in such a way is very important in managing a project. Introducing techniques of controlling time, costs, risks, communication, integration, etc. are the perfect addition to the creative and technical preparation achieved during the years of the architectural career. We no longer build buildings like we used to nor do we pay for them in the same way. Buildings today are no longer only shelters but are also life support systems, communication terminals, data manufacturing centres, and much more. Buildings are incredibly expensive tools that must be constantly adjusted to function efficiently. The Management of construction and economics of building has become as complex as its design and requires a thorough understanding.

Learning Outcomes:

At the end of the course the student will be able to:

LO1: Understand the role of the architect as project coordinator / Manager.

LO2: Prepare bar charts, CPM charts and manage the construction process efficiently.

LO3: Time Cost Optimization and understanding value engineering.

LO4: Understand the importance of entrepreneurship skills in innovatively approaching the projects to benefit the client.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	**Building Economics** Demand and Supply of built spaces, Market analysis, choice of consumer and building activity as an industry.	16
2	**Construction Management** Definition of the term 'Management', and understanding Planning, Programming in advanced and timely execution thereof. Site Management and Job Layout, Reshaping, rescheduling of work as per the site conditions and prevailing circumstances.	32

	Office Management and its structure with the criteria for decision making, relevancy of decision-making and responsibilities, therefore. Methods of Planning of execution of work considering various factors like availability of design, details, material, labour, etc. and comparison of planning and actual execution of work. Labour welfare laws and other laws related to the construction industry. Various methods for planning and programming for Project management – Various Schedules, Network Techniques (CPM, PERT), Bar charts, etc. Introduction to basic software related to Project Management.

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE DESIGN & PLANNING

Programme	Bachelor of Architecture	Branch/Spec.	ARCHITECTURE
Semester	VI	Version	2.0.0.0
Effective from Academic Year	2022-23	Effective from the batch Admitted in	June 2019
Subject code	2VIIA05EED	Subject Name	Energy Efficient Design & Green Architecture

Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture (DT)		Practical (Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objective

To develop skills, knowledge and understanding related to environmental sustainability, construction and building technology, adopting the principles and practices of Energy Efficient Design, while responding to environmental challenges such as Climate change, environmental degradation through Green Architecture.

Learning Outcomes:

After completion of the course, the students will be able to:

LO1: Understand the fundamentals of climate-responsive design in built spaces.

LO2: Understand various passive and active design principles to achieve sustainability.

LO3: In-depth understanding of energy optimization through various sustainable strategies.

LO4: Understand various sustainable/green building materials and their application.

LO5: Relate and understand terminologies like Net-zero energy building, Carbon neutral building, urban heat island effects etc.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	**Sense and Sensitivity:** This module shall focus on inculcating sensitivity towards the environment with respect to the building industry. The module shall make students aware of the impacts of building materials on the surroundings and thereby on the environment. The module shall develop a sense of designing the building using passive solar principles.	10
2	**Design Principles:** The module shall focus on understanding various design principles through vernacular architecture. Understanding passive solar architecture and its various techniques based on different climate zones.	11

3	**Material Sense and Application:** The module shall focus on exploring local and advanced materials application and their impact on the environment. Resource optimization and conservation as one of the major learnings of the module.	11

CONTENT AND TEACHING UNIT

Product Design

The Product Design discipline deals with issues related to the design of a wide range of products, services, and experiences by providing tangible solutions to the needs of users. As part of the curriculum, students learn to apply basic principles of design, knowledge of ergonomics, materials, and manufacturing techniques as well as their aesthetic sensibilities.

These sensibilities are developed and honed through design projects where students are encouraged to design pleasing and user-friendly products which respond to the user's needs and aspirations.

Interior Design:

Designers craft spaces that anticipate our needs and appeal to our emotions while pulling from a broad set of skills and technical knowledge. Interior design has changed dramatically since the early 20th century when it was just beginning to emerge as a profession. Interior designers are expected to have a working knowledge of

- Textiles, materials, color, space planning, sustainability, and more
- Software applications for 2D & 3D Computer-Aided Design (CAD) and Building Information Modeling (BIM)
- Structural requirements, health & safety issues, and building codes

(iii) 1 design studio or construction studio or project or thesis period or hour shall have 1 credit

GANPAT UNIVERSITY

FACULTY OF ARCHITECTURE, DESIGN & PLANNING

Programme	Bachelor of Architecture				Branch/Spec.	ARCHITECTURE		
Semester	VIII				Version	2.0.0.0		
Effective from Academic Year	2022-23				Effective from the batch Admitted in			June 2019
Subject code	2VIIIA01PT	Subject Name			Professional Training			
Teaching scheme					Examination scheme (Marks)			
(Per week)	Lecture(DT)		Practical(Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	-	-	30	-	30	Theory	-	-	-
Hours	18-Weeks' Training					Practical			100

Objective

The student shall undergo Practical Training in the office of an Architect or an organization operating in an allied field of practise or research, duly approved by the institution, under the mentorship of an architect having experience of at least 5 years.

During this internship of 18 weeks student will engage with work in an architectural practice/government architectural department and train under architects registered with COA or equivalently registered in foreign countries (Training in a foreign country shall be approved and monitored by the committee including the Head of the Institute).

Submission of 18 weeks' work shall be in the form of a compilation of weekly reports & a portfolio which is mandatory along with a completion certificate from the firm at the end of the training, along with this, a stage-wise examination will be conducted for assessment of practical exposure given to the student.

Learning Outcomes:

LO1: Understand the way the architecture design process evolves in a professional working environment, considering building bye-laws, structure, and services' issues to create final output/s.

LO2: Understand the interrelationship between the working system of an office & site correspondence, through the preparation of drawings at the office and their execution on site.

LO3: Get adequate field exposure to understand the nuances of professional life.

LO4: Enhance the skills of office & project management and teamwork to enhance their capability and employability.

CONTENT AND TEACHING UNIT

Content	Hrs.
The student will involve in the chosen office for various aspects of work mentioned below:	

● Designing and detailing the project including discussions with the project team, clients, consultants & suppliers ● Office experience includes preparation of presentation/approval/execution drawings along with specification, tender, estimations, and research work. ● Digital skills for compilation, documentation, record keeping & office management work, etc. ● Periodic site visits should include enhancing the skills of observation, coordination with various agencies & supervision of ongoing projects on site.	18-Weeks Training
Evaluation Criteria: The students shall be evaluated in a final viva-voce/jury/review undertaken by a panel of two or more examiners. When participating in the final Jury/Viva, students are required to show the work they completed over the training of the 18 weeks in the form of a portfolio, daily and weekly reports, and an experience certificate.	
PRACTICAL CONTENT	
Employment letters, Daily and weekly reports, completion certificates, and experience letters are to be provided as formats to the students by the institution.

Objective

Urban Insert:

- To observe, understand and analyze the urban aspects to mitigate the issues in an urban context and introduced the profound Urban Insert.
- To deal with and resolve complex issues into a valid expression of architectural character and urbanism.

LO1: To study and learn about the growth of the city in the context of geography, demography, and overall civilization
LO2: To gain knowledge of various issues of socio-economic and socio-cultural background in urban settlements.
LO3: To address the large-scale problems and find the appropriate solutions with the help of the specific agencies, departments, and Offices of the government -Nongovernment authorities.
LO4: To apply new technics with innovative Ideas connecting the threads with conservation, green building, Sustainability, and Artificial intelligence.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	To Identify the city and the specific area of the same facing the urban challenges. To gather the data from various Govt-Non Govt agencies, make site visits for feasibility survey and existing situation.	64
2	To prepare charts, Tables, and Graphs to demonstrate various outcomes received through the exercises like built v/s open, green cover, Traffic density, Services, Floor index, Road networks, Land use etc	64

3	Taking the learning outcome from the studies further to apply for the new proposal appropriately in urban context and fabric. These involve area programs, building bye-laws, Building codes etc	80
4	To prepare the proposed design and produce the required drawings and models with the design process involved.	80

Hours	4	-	-	-	4	Practical	-	-	-

Objective

Enable the students to familiarize themselves with Urban Planning issues, objectives, framework, processes, techniques, and components. The subject also exposes the students to various planning legislation and norms.

Learning Outcome :

LO1: Understand the meaning of Urban Planning as an allied domain as well as learn the differences between Urban Planning and Urban Design.

LO2: Understand the various planning processes and their objectives in terms of Macro-Level to Micro-Level Planning.

LO3: Understand the different parameters of Urban Management pertinent to various urban-level issues and concerns.

LO4: Understand the statutory bodies and policies concerned with Urban Planning and Management.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	**Introduction to Urban Planning and Management.** Meaning of Urban and Planning, the Need and the various Objectives of Urban Planning; Evolution of Planning; Characteristics of Settlements; Types of Plans and Planning processes; Introduction to Urban Management	12
2	**Problems and Issues of Urban areas:** Urban problems like affordable housing, traffic congestion, livelihood, crime, living conditions, degraded environment, etc., should be appropriately addressed. Land Use, Communication Systems, Slums, Sporadic growth, and Conurbation.	16
3	**Planning Framework and Processes for various Plans:** Hierarchy of Plans: Perspective Plan/Spatial Plan, Regional Plan, Zonal Plan, Development Plan, Local Area Plan; Objectives, Planning Processes, and Responsible Authorities for each level of Planning.	16

4	**Aspects of Urban Planning and Management** Aesthetics, Safety and Security, Slums, Decay, Reconstruction, Renewal, Regeneration, Transport, Economics, Suburbanization & Peri-Urbanization, and Environmental factors.	20

Hours	3	-	-	-	3	Practical	-	-	-

Objective

To introduce set up for business as an architect, to develop the creative and leadership skills for the same, to develop the confidence and skills in preparing business plans, and to propose and sell ideas to potential clients and investors.

Learning Outcomes:

Upon successful completion of the course, the student will be able to:

- Understand aspects of starting a new venture.
- Understand and appreciate the challenge of starting and managing new ventures.
- Frame and develop start-up strategies to understand issues and problems during the growth stage, including delegation, formalization of system, and HR issues.
- Prepare a bankable business plan which can be considered a prerequisite for starting and obtaining finance, particularly from venture finance, public issue, etc.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs.
1	**The Nature and Importance of Entrepreneurship:** Nature and development of Entrepreneurship, Definition of entrepreneurship, The entrepreneurial decision process, Types of start-up, Role of entrepreneurship in economic development. **The Entrepreneurial and entrepreneurial mind:** The entrepreneurial process-Identify and evaluate the opportunity, development of a business plan, determine the resources required, management the enterprise, Managerial versus entrepreneurial decision making, Causes for interest in entrepreneurship, Corporate versus intrapreneurial culture, Climate for intrapreneurship **The Individual Entrepreneur:** Entrepreneurial feelings, Entrepreneur background and characteristics, Motivation, Role models, and support systems	
2	**Imagine design solutions in the built environment.** Describe a problem or need in the built environment Define the built environment Discuss reasons for embarking on an entrepreneurial journey Identify market parameters through research Outline what human-centered design entails in the built environment Identify a problem or need in the built environment and propose a solution Recognize the implications of real-world examples	

3	**Test ideas, research the market, and define stakeholders** Articulate a problem statement Identify and empathize with a particular need in the market Apply market analysis methodology to determine the potential customer or user market Identify and map stakeholders impacted by your idea Classify the market into segments	
4	**Calibrate an idea and create a development framework** Decide on vital early pivots and transitions Determine milestones for development Distinguish between mission and vision statements Draft vision and mission statements for your venture Evaluate mission and vision statements to determine best practice	
5	**Determine the value proposition and model the user journey** Select metrics to prove the value proposition of a venture Illustrate the purpose of a value proposition Construct the value proposition of a venture Deconstruct the user journey related to a product or service Relate to and empathize with the target user or customer Draft a user journey map Reflect on the user journey to understand a greater context	
6	**Prototype your built environment solution** Articulate the benefits of your prototype Identify an element to prototype Critique the hypothesis of your and your peers' proposed prototypes Assemble a set of design specifications off which to build Select specifications that most align with your prototype Create a tangible or digital prototype of your idea, or a portion thereof Decide on the appropriate medium for your prototype	
7	**Create a business model** Determine how your venture will generate revenue Distinguish among different types of business models Investigate other business models to find what is best suited to your venture Design a custom business model for your venture Apply critical financial planning skills	
8	**Tailor the message and pitch your venture** Differentiate among three different pitch formats in terms of purpose and audience Determine the best methods for communicating your venture idea Critique examples of pitches in terms of audience appropriateness and message framing Select the relevant information and appropriate angle for each of the three-pitch formats Articulate the benefits of incorporating storytelling in the communication of your venture idea Present your venture in three different pitch formats Decide how to frame your message and communicate it effectively to diverse audiences	
9	**Develop an action plan to operationalize your venture** Articulate critical entrepreneurial negotiation skills and strategies used to engage with people and partners Identify the essential players in your venture Classify different types of funding and their benefits Decide on the key priorities and objectives of your venture Analyze a funding strategy Compile a one-year action plan for your venture Reflect on the design solution and venture ideation process

Objective

- To develop critical thinking based upon valid inquiry and logical structure in the field of Architecture.
- To generate awareness in research and the meaning of systematic search with a comprehensive introduction of technical documentation.
- Understanding the impact of research in developing cognizant Theses Synopses and proposals, as well as applying gained knowledge of methodology toward appropriate Thesis Research.

Learning Outcomes:

Upon successful completion of the course, the student will be able to:

- Understand the methodological approach to carrying out a research-based program in order to design an architectural project involving a set of complex issues.
- Utilize approaches that aid in developing a foundation for research skills – appropriate approaches for topic identification, methodologies, readings, data review and sourcing, structure, and citation will provide a base for students approaching their Design Thesis Projects.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs.
1	Introduction to Research: General understanding of what is Research, its objectives & significance in Architecture & Design	6
2	Imparting a comprehensive understanding of Research Methods, vocabulary, and relevant terminologies	6
3	Types of Research and various methodologies employed for undertaking these various research types	12
4	Application of Research methods with a focus on generating credible Design Thesis Synopses and proposals	8
5	Utilization of Research Methodologies in defining appropriate case studies, sites, Design briefs, and programmes/programmatic assemblages for Design Thesis	6
6	Preparation of a Final Synopsis for Design Thesis and its objective presentation as an application of Research Methodology	10

CONTENT AND TEACHING UNIT

Architectural Conservation

This elective is intended to sensitize students to the architecture of built heritage comprising historic buildings, areas, cities, and cultural landscapes. It aims at training students in tackling conservation issues at the planning level, interpreting history in a modern context, dealing with structural issues, and documentation of cultural and historic heritage buildings. Aspirants learn how to encounter and overcome development issues while being tactful to social responsibilities, sustainability, and urban modernizations. The elective focuses on theoretical and practical aspects and Principles & Techniques in an academic discipline such as the introduction of Conservation, Structural Conservation (Material & Techniques), Architectural History, Computer Application, Visual Communication, and Structural Conservation Management.

Architectural Criticism and Journalism

This elective focuses on the development of theoretical discourse in the fields of Architecture & Design, as well as the use of various techniques to critically observe and objectively write about projects in the domain. The student herein shall learn how to look at Architecture through a theoretical framework, placing it alongside a functional and visual approach, so as to holistically understand and then represent the process and the final product as a verbal discourse or inquiry. Furthermore, the student shall explore various techniques involved in Writing about Architecture & Design Projects, observing on-site, Interviewing an Architect or a Designer, Objectively Reporting, as well as creating Journalistic Articles. The elective shall also help students in Refining their understanding of Architectural Theory through inspired discussions and debates in class, along with regular reading and writing assignments to further strengthen their latent critical journalistic and theoretical potential.

Objective

The course demonstrates students' ability to synthesize learnings of architecture, building systems, applied engineering, liberal studies, and humanities through a capstone project, which displays creative and critical thinking abilities and skills developed through the course.

Developing a design brief, proposal, and justifying the project involves research, analysis, and clarity in the thought process. The Architectural Design thesis focuses on handling the complexities of the projects through research outcomes and thinking critically to achieve architectural resolution. The course demands design development with clarity of spatial arrangements, volumetric explorations, building envelope design, structural systems, services, material explorations, innovative construction details, etc.

Learning Outcomes:

Upon successful completion of the course, the student will be able to:

- Develop an appropriate project premise.
- Develop project brief and proposal, functional programme.
- Develop Architectural sense to respect the needs of the project.
- Develop design philosophy, critical thinking, and the ability to synthesize smaller aspects of the project.
- Deliver sensible architectural expression through various architectural interventions.

Credit	2	-	-	-	2	Theory	40	60	100
Hours	2	-	-	-	2	Practical	-	-	-

Objectives

- To impart awareness and technicalities of the Code of Conduct and the significance of The Architects Act 1972 in Professional Practice.
- Expected Skills / Knowledge to be transferred: Legal, Technical, and financial aspects of Architectural practices and management skills for Professional Practice.
- To understand an architect's duties and liabilities and knowledge of building and environmental bylaws in the Indian context.

Learning Outcomes

LO1: Knowledge of the role of Professional and Statutory bodies pertinent to an architect.
LO2: An understanding of the provisions in The Architects Act 1972.
LO3: An Understanding of the Code of Conduct of an architect as prescribed by the Council of Architecture.
LO4: Familiarity with the process and role of an architect in project execution.

CONTENT AND TEACHING UNIT

Unit	Content	Hrs
1	**INTRODUCTION & OVERVIEW OF THE PRACTICE OF ARCHITECTURE, ETHICS OF ARCHITECTURE, LEADERSHIP IN ARCHITECTURE** ● The Course shall include some significant aspects of Professional Practice. The title 'Architect,' as prescribed by The Architects Act 1972, Sets up a Design firm's Infrastructure, Human Resources, Tools, Computer software, licenses, and areas of specialization, as well as registration with the Council of Architecture.	2
2	**PROFESSIONAL ROLE OF AN ARCHITECT** ● Roles and responsibilities of the architect in society; Architecture as compared to other professions; The difference between a profession and a business.	2
3	**ACTS & ORGANIZATIONS** ● The Architects Act 1972, Registration of Architects, COA, IIA, and other organizations related to the architectural profession. Professional Practice Regulations 1989 and Minimum Architectural Education Regulations under the Architect's Act. IIA Code of Professional Conduct	4

4	**ARCHITECTURE SERVICES, CONDITIONS OF ENGAGEMENT & SCALE OF FEES** ● Architectural Services Rendered: Architect's duties; drawings to be prepared; Architects relation with other parties connected with works such as client, contractor, sub-contractors, consultants, municipal and public authorities. Conditions of agreement include the scope of work, comprehensive architectural services and competitions, remuneration, professional fees, and charges per IIA norms.	**4**
5	**ARCHITECTURAL COMPETITIONS** ● Regulations governing the conduct of competitions, open & closed competitions, appointment & duties of Assessors, instructions to participants, award of premium. Units and mode of measurements - clerk of work and responsibilities; Inspection of work during construction; certification of contractor's bills; bill of quantities; defects liability; Schedule of rates, tenders; public, limited, and negotiated tender documents; allied formalities.	**4**
6	**PROJECT MANAGEMENT & LEGAL ASPECTS** ● **Tender:** Calling for Tenders, tender documents, open & closed tenders, labour & demolition tenders, conditions of tender, submission, scrutiny, recommendations & award of contract. ● **Contracts:** Item Rate, Lump-sum, Cost plus Percentage, etc. General principles of the Indian Contract Act; Building contracts, conditions, and forms of contract, a study of the standard warranty of the Indian Institute of Architects. Articles of Agreement. Administration of contract. ● **Arbitration:** Principles of Arbitration, Indian Arbitration Act 1940, Powers and duties of arbitrators, revoking authority; umpire, award cost fixed-fee, cost with a penalty, Labour day work, piece work daily ● **Easements:** definition; various types of easements; necessary conditions for the enjoyment of easement; Fire insurance's definition, cover note; insurance for new work and additions; an insurable property value; claim due to fire. Insurance of completed and occupied building ● **Valuation**: The purpose of valuation, types of valuation- terms: market value, book value, capital cost, capitalized cost, salvage/scrap value, various methods of estimating the depreciation of building properties	**10**
7	**TYPES OF ARCHITECTURAL FIRMS** ● Architects' Offices, Proprietorship firms &Partnership firms-combined concerns; Comparison between partnership and Proprietorship firms. Staff structure; filing of records; correspondence and drawings; maintenance of accounts; presentations in meetings; and recording minutes of the meeting. Role of consultants and Coordination between different consultants on a big project.	**6**

CONTENT AND TEACHING UNIT

Green Buildings & Rating Systems:

This elective course is intended to provide the students with the importance of various rating systems as green ratings assess a building based on its predicted performance over its entire life cycle — conception through the operation. This results in the development of buildings that consume fewer natural resources without sacrificing the acoustic, thermal, and visual comfort of their occupants.

This is furthered by attempts to quantify aspects such as energy and water consumption, renewable energy adoption, and so on to manage, control, and reduce a building's resource consumption, waste generation, and overall ecological impact within certain nationally acceptable limits/ benchmarks.

Sustainable Development:

This elective course focuses on creating a knowledge base on sustainable development with a view to balance our economic, Infrastructure, and social needs, allowing prosperity for now and future generations. Students shall learn about major initiatives in the efficient management of natural resources and the prevention of environmental pollution with a focus on Sustainable Development in Urban areas, as well as gain an understanding of the efforts that can be made at the Government level to improve the environment, basic services & security, green covers, economy and the quality of life of urban areas.

Furthermore, the course shall also showcase the use of environmental management tools that help to improve the quality of the environment, to assess local vulnerabilities with respect to climate, for natural disasters, and to achieve sustainable developmental needs.

The main topics that shall be covered in this elective are as follows:

- Urbanization and Sustainable Development
- Sustainable Development and International Contribution
- Sustainable Urban Development in India
- Initiatives taken by the Government of India in Urban Planning and Development
